Consider a resolution approving the City of Round Rock Water Conservation Plan.

The Texas Water Development Board (TWDB) Financial Assistance Programs specified in its rules under Texas Administrative Code 31, Chapters 355, 363, 371, 375, 382, and 384 and to public utilities that provide potable water service to 3,300 or more connections, that the entity must have a Water Conservation Plan. The Water Conservation Plan should also include a Utility Profile, which is an evaluation of the applicant's water and wastewater system and customer water use characteristics, to identify water conservation opportunities, and should set goals to be accomplished by water conservation measures. The plan is to be reviewed and updated no less than every five years. Round Rock’s updated plan is due May 1, 2019 to the TWDB.

The Water Conservation Plan is a strategy or combination of strategies for reducing the consumption of water, reducing the loss or waste of water, improving or maintaining the efficiency in the use of water, or increasing recycling and reuse of water.
