Mr. Hudder, Director of Transportation, explained that this was the third and final time that the impact fee study would be presented to the CIAC Committee. He noted that after this meeting, the impact fee study will be presented to City Council. He listed the options that the CIAC Committee could choose from to move forward and make a recommendation to City Council. The choices included: 1) Forward the study to City Council with no fee recommendation; 2) Recommend to City Council to adopt the maximum fee established during the study; or 3) Recommend to City Council to adopt the recommended fee and to approve the Roadway Impact Fee as presented.

Mr. Whitacre briefly explained the purpose and the process of the Roadway Impact Fee noting that the public hearing for the report was scheduled for the City Council meeting on September 13<sup>th</sup> and the ordinance adoption was scheduled for September 27<sup>th</sup>.

He briefly reviewed growth, cost, and service units for each service area and explained how impact fees were calculated. He noted that if the ordinance is adopted, vehicle-miles and fees will be made available to the public; the development community will not be required to do any additional calculations. Mr. Whitacre specified that the Roadway Impact Fee is a one-time fee assessed only to new development. The fee is assessed during the Final Plat process and paid at Building Permit.

He continued to briefly discuss the collection rate considerations for the most common land uses and compared the current TIA (Traffic Impact Analysis) collection rate.

Mr. Whitacre finalized his presentation noting that the purpose of the study was to determine the fee needed to pay the cost of vehicle-miles; City Council will determine the impact fee rate. He reviewed the upcoming schedule and discussed the City Council recommendations available to the committee.

Following a discussion, a motion was offered.
