

# City of Round Rock

## Capital Improvements Advisory Committee

### (CIAC)

### Meeting Agenda - Final

---

Wednesday, November 3, 2021

5:30 PM

City Council Chambers, 221 East Main St.

---

**A. CALL MEETING TO ORDER**

**B. ROLL CALL**

**C. CITIZEN COMMUNICATION**

*[Pursuant to Texas Government Code, Section 551.007 which allows the public to speak for a total of three (3) minutes on any of the agenda items listed below - excluding any executive sessions.]*

**D. APPROVAL OF MINUTES:**

D.1 Consider approval of the minutes for the June 2, 2021 CIAC meeting.

**E. PRESENTATIONS:**

E.1 Consider a presentation from the Utilities and Environmental Services Department, review the draft report, and consider a recommendation to Council regarding land use, Capital Improvement Projects (CIP), and maximum Capital Recovery Fees.

E.2 Consider a presentation from the Transportation Department and recommend approval of the Semi-Annual Report to City Council with respect to the progress of the Roadway Impact Fee Capital Improvements Plan and identification of any perceived inequities in implementing the plan or imposing the impact fee.

E.3 Consider a presentation, provide comments, and consider a recommendation to the City Council regarding a Roadway Impact Fee Study Update.

**F. ADJOURNMENT**

*In addition to any executive session already listed above, the [Body Name] for the City of Round Rock reserves the right to adjourn into executive session at any time during the course of this meeting to discuss any of the matters listed below as authorized by Texas Government Code:*

*§551.071 Consultation with Attorney*

*§551.072 Deliberations regarding Real Property*

*§551.073 Deliberations regarding Gifts and Donations*

*§551.074 Personnel Matters*

*§551.076 Deliberations regarding Security Devices*

*§551.087 Deliberations regarding Economic Development Negotiations*

**POSTING CERTIFICATION**

*I certify that this notice of the Capital Improvements Advisory Committee was posted on the 29th day of October 2021 at 5:00 p.m. as required by law in accordance with Section 551.043 of the Texas Government Code.*

*/ORIGINAL SIGNED/  
Meagan Spinks, City Clerk*

# City of Round Rock

## Meeting Minutes - Draft

### Capital Improvements Advisory

#### Committee (CIAC)

Wednesday, June 2, 2021

#### CALL MEETING TO ORDER

*The Capital Improvements Advisory Committee for the City of Round Rock met on Wednesday, May 5, 2021 in the City Council Chambers, located at 221 E. Main Street, Round Rock. Chairman Henderson called the meeting to order at 5:30 PM.*

#### ROLL CALL

**Present** 7 - Vice Chair Jennifer Henderson  
Alternate Vice Chair Greg Rabaey  
Commissioner J. Hollis Bone  
Committee Member Paul Emerson  
Commissioner Selicia Sanchez-Adame  
Committee Member Rob Wendt  
Ad-Hoc Manuel Azuara

**Absent** 3 - Committee Member Stacie Bryan  
Committee Member Casey Clawson  
Committee Member Jennifer Sellers

#### CITIZEN COMMUNICATION

*There were no citizens wishing to speak at this meeting.*

#### APPROVAL OF MINUTES:

**D.1** Consider approval of the May 5, 2021 meeting minutes.

**A motion was made by Committee Member Bone, seconded by Committee Member Sanchez-Adame, to approve the May 5, 2021 meeting minutes. The motion passed by the following vote:**

**Ayes:** 7 - Vice Chair Henderson  
Alternate Vice Chair Rabaey  
Commissioner Bone  
Committee Member Emerson  
Commissioner Sanchez-Adame  
Committee Member Wendt  
Ad-Hoc Azuara

**Nays:** 0

**Absent:** 3 - Committee Member Bryan  
Committee Member Clawson  
Committee Member Sellers

## PRESENTATIONS:

- E.1** Consider and recommend approval of the Semi-Annual Report to City Council with respect to the progress of the Capital Improvements Plan and identification of any perceived inequities in implementing the plan or imposing the Roadway Impact Fee

*Brian Kuhn, Transportation Assistant Director, made the staff presentation.*

**A motion was made by Alternate Vice Chair Rabaey, seconded by Committee Member Bone, that the draft report be recommended for City Council approval. The motion passed by the following vote:**

**Ayes:** 7 - Vice Chair Henderson  
Alternate Vice Chair Rabaey  
Commissioner Bone  
Committee Member Emerson  
Commissioner Sanchez-Adame  
Committee Member Wendt  
Ad-Hoc Azuara

**Nays:** 0

**Absent:** 3 - Committee Member Bryan  
Committee Member Clawson  
Committee Member Sellers

## ADJOURNMENT

*There being no further business, Chairman Henderson adjourned the meeting at 5:35 PM.*

*Respectfully Submitted,*

*Cecilia Chapa, Planning Technician*

# Capital Improvements Plan Progress

Semi-Annual Report  
November 2021

## **SUMMARY**

The Local Government Code Section 395.058 requires the Capital Improvement Advisory Committee (CIAC) to report to the political subdivision the progress of the capital improvements plan and any perceived inequities in implementing the plan or imposing the Impact Fee. Included herein is the semi-annual report for the reporting period of April 1, 2021, to September 30, 2021. This report consists of assessing the actual growth rate in comparison to the projected growth rate, the status update of capital improvement projects, and the Impact Fees collected during the reporting period.

The local government code also requires the CIAC to advise the City Council on updating the land use assumptions, capital improvements plan, and Impact Fees. These items were last updated by the City in November 2020.

Figure 1 shows the groundwater and surface water produced and the number of active water services over the past two years. Although the City continues to grow, the total water production remains relatively steady. Water usage is highly dependent on weather patterns; however, the City's conservation and reuse water programs are also significant factors impacting water usage.

**Figure 1**

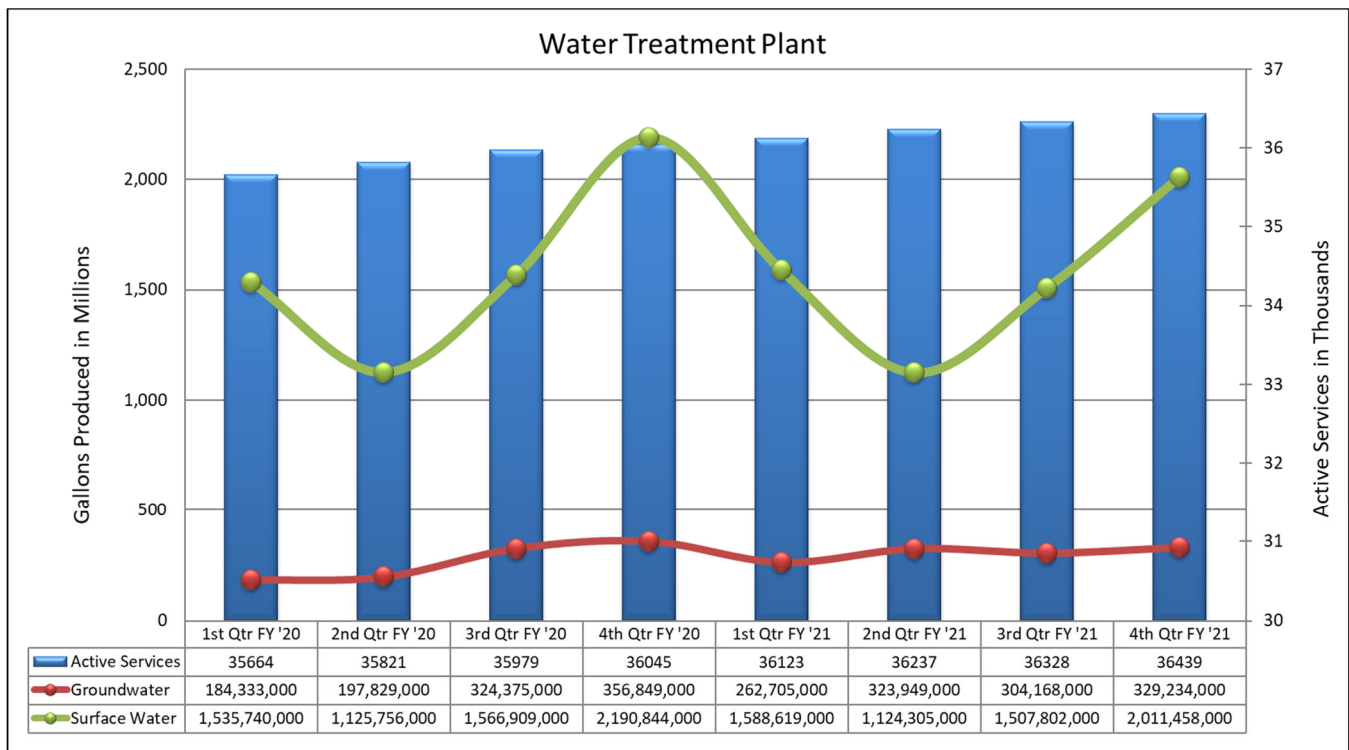

Figure 2 reflects the daily average of potable water produced each month over the last five years. Total water production is dependent on weather conditions; therefore, discretionary water usage is higher during the summer months.

**Figure 2**

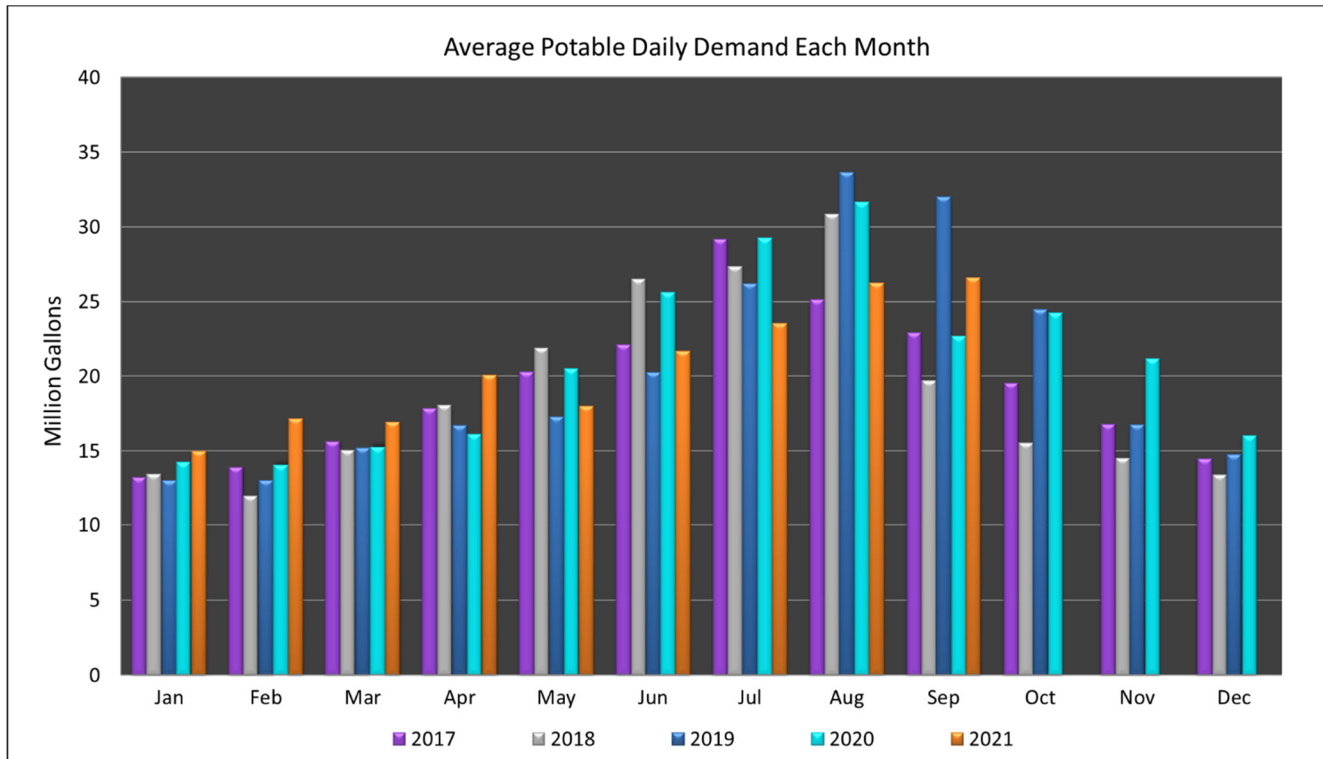

Figure 3 reflects the monthly potable treated water production and the Type I Reuse treated water production. The City's reuse water system began production in October 2012 with three customers: Old Settlers Park, Dell Diamond, and Forest Creek Golf Course. The City has since expanded the system to Forest Creek HOA, Legends Village Subdivision, Austin Community College, Texas A&M Health Science Center, Forest Grove and Vizcaya Subdivisions, and the newly opened Kalahari Resort. The City continues to promote reuse water in the northeast part of Round Rock, and as depicted in Figure 3, the demand continues to grow.

**Figure 3**

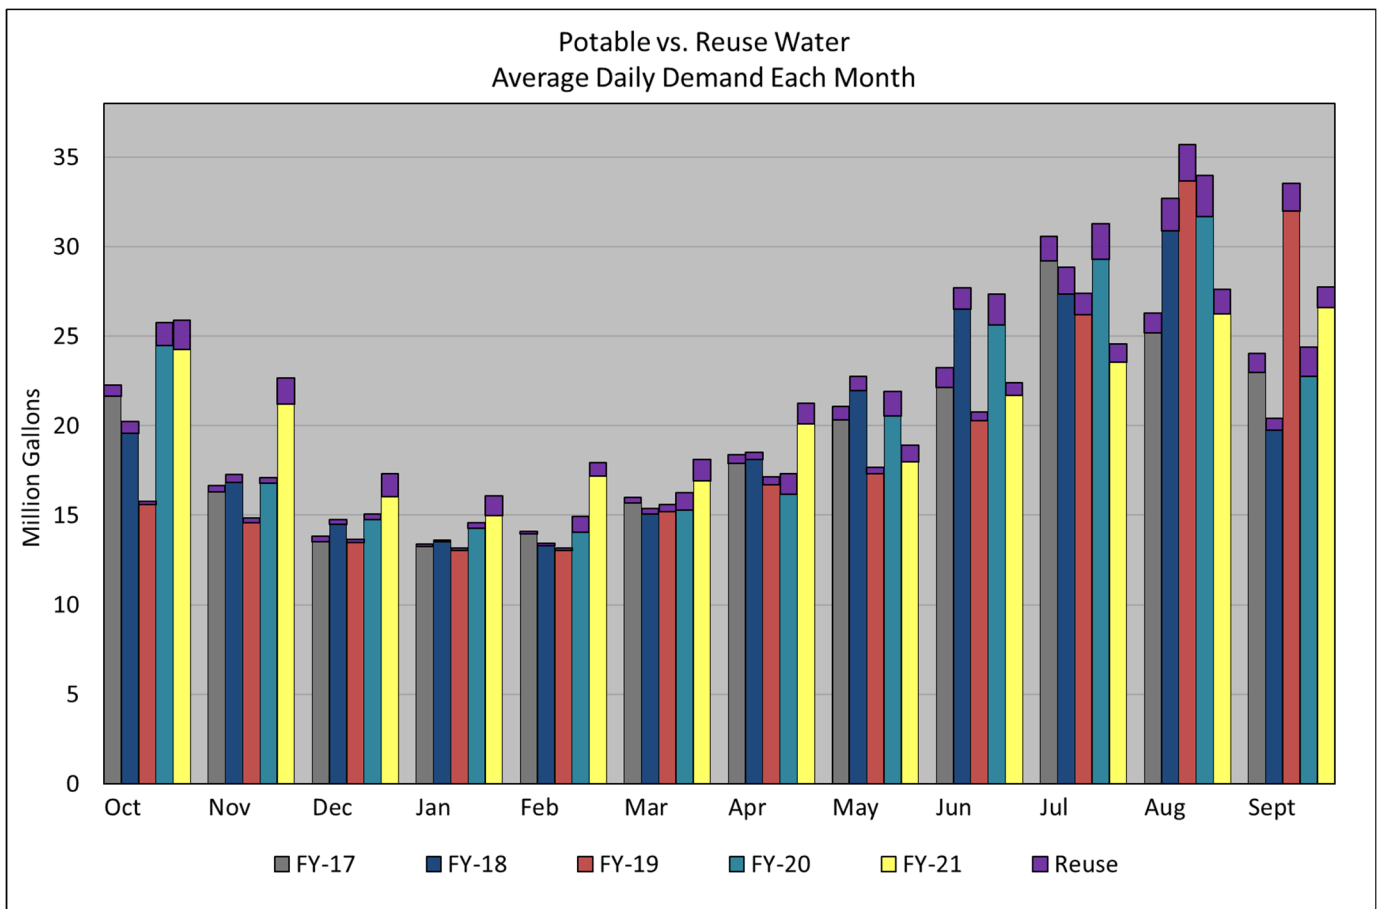

Figure 4 shows the number of new single-family building permits issued in the City of Round Rock and the City's extra-territorial jurisdiction (ETJ). Over the past five years, new single-family housing starts in the City have ranged from 556 to 929 per year. Single-family permits issued have continued to increase to an average of about 80 permits per month over the past six months. Most of the current construction activity is in the northeast part of Round Rock in the Saul's Ranch, Vizcaya, Salerno, Quick Ranch, and University Heights Subdivisions. There is also new single-family construction occurring in other parts of the City in the Chisholm Trail Park, Preserve at Wyoming Springs, and Clear Creek Subdivisions. Townhomes under construction include Sonoma Townhomes, Schulz Townhomes, Townhomes at Gattis School Road, and Tiger Trail Townhomes. Most of the Municipal Utility Districts (MUDs) in Round Rock's ETJ are nearing buildout; however, as noted in Figure 4, Siena MUD No. 2 continues to experience a steady number of new housing starts.

**Figure 4**

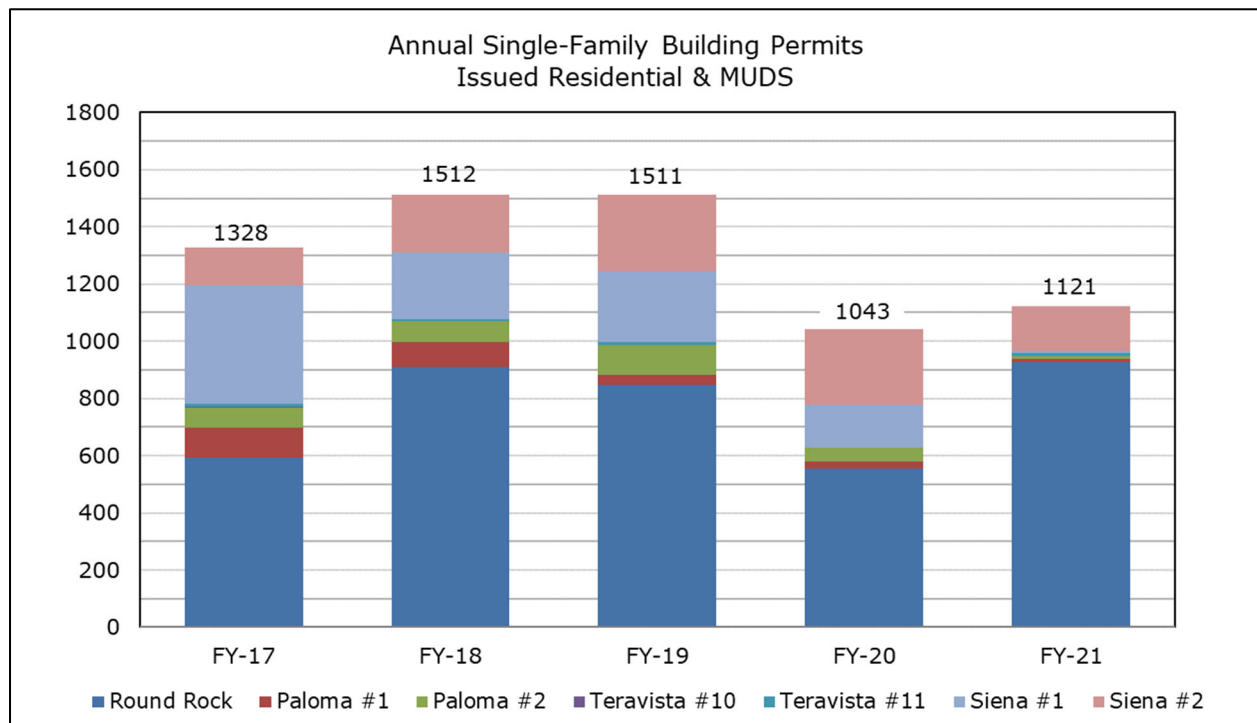

Table 1 reflects the number of multi-family units permitted annually. Currently, there are four multi-family complexes in plan review and five complexes under construction. These include two Legacy facilities on University Boulevard and Red Bud Lane, Warner Ranch, Round Rock Phase 2 behind the outlet mall, and Arrington Ridge.

**Table 1**

Fiscal Year	Multi-Family Units
FY 2017	330 (170 LUEs)
FY 2018	652 (327.5 LUEs)
FY 2019	432 (218 LUEs)
FY 2020	430 (196.5 LUEs)
FY 2021	584 (391.5 LUEs)

Table 2 reflects the number of new commercial building permits issued annually. This number has been steady, ranging from 25 to 50 annually, and commercial development in the City continues to trend upward. Current permits are mostly office property, hotels, small retail, light industrial, and restaurants.

**Table 2**

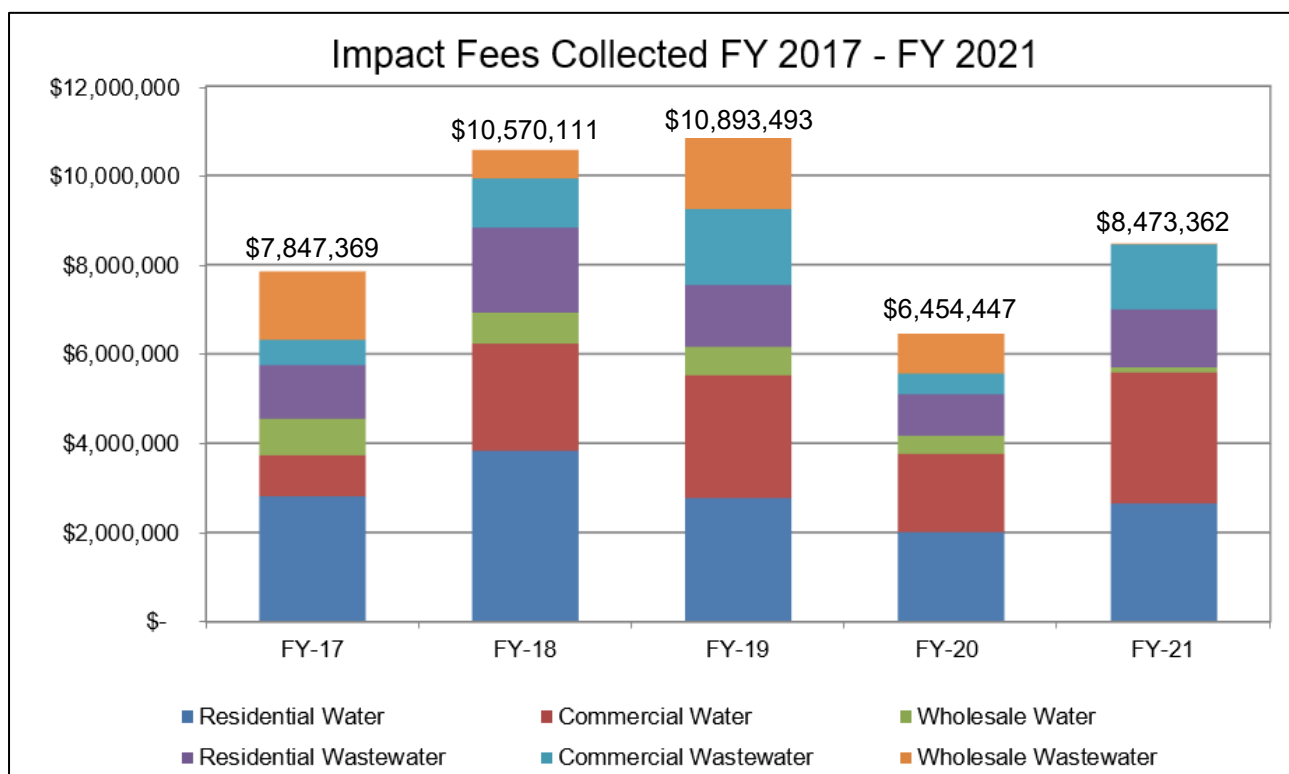

Fiscal Year	Commercial Building Permits
FY 2017	25 (168 LUEs)
FY 2018	43 (220.5 LUEs)
FY 2019	50 (262 LUEs)
FY 2020	44 (150.5 LUEs)
FY 2021	39 (161 LUEs)

Table 3 and Figure 5 summarize the Water and Wastewater Impact Fees collected for In-City retail residential (single-family and multi-family) and commercial customers and Out-of-City wholesale customers. From FY-17 to FY-19, there was an increase in the total Impact Fees collected due to new developments; however, FY-20 showed a significant decrease attributed to the virus pandemic. FY-21 indicates that the Impact Fee collections in the City trended upward to prior FY-20 amounts, and Out-of-City wholesale decreased in FY-21 mainly due to the buildout of many of the MUDs.

**Table 3**

Impact Fees	FY-17	FY-18	FY-19	FY-20	FY-21
<b>In-City Retail</b>					
Residential Water	\$2,812,465	\$3,830,017	\$2,770,650	\$2,008,822	\$2,649,580
Residential Wastewater	\$1,201,518	\$1,905,615	\$1,381,154	\$930,467	\$1,296,554
Commercial Water	\$915,617	\$2,399,541	\$2,750,040	\$1,752,110	\$2,934,225
Commercial Wastewater	\$567,288	\$1,102,400	\$1,701,974	\$461,347	\$1,457,580
<b>Out-of-City Wholesale</b>					
Water	\$818,121	\$692,763	\$639,567	\$406,253	\$114,713
Wastewater	\$1,532,360	\$639,776	\$1,650,108	\$895,448	\$20,711
<b>Total Collected</b>	<b>\$7,847,369</b>	<b>\$10,570,111</b>	<b>\$10,893,493</b>	<b>\$6,454,447</b>	<b>\$8,473,362</b>

**Figure 5**

During the latest water model update in 2020, the City assumed that 1,433 LUEs per year would be added to the water system. At an Impact Fee of \$4,234 per LUE, this would indicate that the City should be collecting approximately \$6.07 million per year in Water Impact Fees if the City's growth rate is as projected starting in FY-21.

In addition, the wastewater model update assumed that 1,027 LUEs would be added to the wastewater system per year. At an Impact Fee of \$1,799 per LUE, this would indicate that the City should be collecting approximately \$1.85 million per year in Wastewater Impact Fees if the City's growth rate is as projected in FY-21.

Comparing these assumptions to the actual Impact Fees collected indicates that the number of new connections to our water and wastewater systems for FY-21 occurred as expected.

Table 4 provides population projections for Round Rock and Round Rock's ETJ. These projections, anticipating a steady growth rate, indicate that capital improvements to the City's water and wastewater utility systems would be necessary to keep up with growth. However, the annual estimates, shown in parenthesis, convey a slower growth rate in the City limits than projected. New projections for "Inside City" from 2021 through 2030 are currently being developed by the City's Planning and Development Services Department.

**Table 4**

Year	Inside City		City's ETJ	
	Projections	Growth Rate	Projections	Growth Rate
2010 (Census)	99,887	-	141,807	-
2011	100,659	0.8%	143,960	1.5%
2012	102,349 (101,702)	1.7% (1.0%)	146,380	1.7%
2013	104,805 (102,349)	2.4% (0.6%)	151,133	3.2%
2014	107,635 (103,107)	2.7% (0.7%)	155,613	3.0%
2015	110,757 (105,405)	2.9% (2.2%)	160,385	3.1%
2016	113,968 (106,591)	2.9% (1.1%)	165,024	2.9%
2017	117,160 (108,353)	2.8% (1.7%)	169,213	2.5%
2018	120,440 (112,201)	2.8% (3.6%)	173,490	2.5%
2019	123,812 (116,120)	2.8% (3.5%)	177,859	2.5%
2020 (Census)	119,468	2.9%	182,323	2.5%
2021	122,827	2.8%	186,062	2.1%
2022	-	-	189,881	2.1%
2023	-	-	193,508	1.9%
2024	-	-	197,218	1.9%
2025	-	-	200,312	1.6%
2026	-	-	203,462	1.6%
2027	-	-	206,670	1.6%
2028	-	-	209,651	1.4%
2029	-	-	212,693	1.5%
2030	-	-	215,795	1.5%

Notes: 2010 is the base year for all projections in this table  
 ( ) Annual Estimates by Planning & Development Services Department

Table 5 summarizes the status of the Water System (Impact Fee eligible) Capital Improvement Projects included in the November 2020 Impact Fee Analysis.

**Table 5**

Completed Water Projects	Completion	Impact Fee Report Estimated Cost	Actual Cost
Creek Bend 12" Waterline	2016	\$415,000	\$415,000
Arterial H Waterline	2017	\$856,400	\$162,460
BCRUA Water Treatment Plant - Ph 1B	2018	\$34,000	\$31,000
South 81 Elevated Storage Tank Pump Station	2019	\$157,000	\$1,070,900
Arterial H Phase II	2020	\$1,470,500	\$1,375,045
BCRUA Phase 1C - WTP Expansion to 32MGD	2020	\$4,465,000	\$3,635,540
Water Dist. Master Plan & Impact Fee	2020	\$66,000	\$220,570
		<b>\$7,463,900</b>	<b>\$6,910,515</b>

Water Projects In Progress	Completion	Impact Fee Report Estimated Cost	Actual Cost
GR-01: E Liberty Ave, N Shephard St & Fannin Ave	2022	\$500,000	\$938,983
GR-05: University Blvd extension from end of 36" main to CR-110	2022	\$1,150,000	\$801,000
GR-02: Kenny Fort Blvd from Forest Creek Blvd to SH45	2022	\$1,570,000	\$1,787,073
GR-03: Kenny Fort Blvd from Old Settlers to Chandler Creek	2024	\$2,450,000	\$4,325,000
GR-04: Sam Bass Rd from FM-1431 to Wyoming Springs Dr	2025	\$7,000,000	\$9,073,000
GR-06: Redbud Ln from south of Palm Valley Blvd to Gattis School Rd	2026	\$4,560,000	\$4,560,000
BCRUA Phase 2 - Deep Water Intake	2027	\$60,608,500	\$73,080,384
		<b>\$77,838,500</b>	<b>\$94,565,440</b>

Upcoming Water Projects	Estimated Completion	Impact Fee Report Estimated Cost
GR-07: Hester's Crossing & CR-172 from west 971 zone to S-81 EST	2025	\$3,270,000
BCRUA Phase 1D - WTP Expansion to 42MGD	2025	\$4,000,500
GR-08: FM-1460 toward Westinghouse Rd, east to future road	2027	\$2,350,000
GR-09: Palm Valley Blvd (north side) extension to CR-110	2029	\$600,000
GR-10: Loop from GR-09 to Westinghouse to University	2030	\$2,440,000
		<b>\$12,660,500</b>

Table 6 summarizes the status of the Wastewater System (Impact Fee eligible) Capital Improvement Projects included in the November 2020 Impact Fee Analysis.

**Table 6**

Completed Wastewater Projects	Completion	Impact Fee Report Estimated Cost	Actual Cost
Lake Creek 2	2017	\$2,652,000	\$1,916,000
Lake Creek 3	2017	\$591,000	\$563,000
McNutt Creek C2 (referred to as C5)	2018	\$1,324,000	\$1,762,000
Brushy Creek 5	2018	\$288,000	\$282,618
Brushy Creek 2	2019	\$685,000	\$349,000

BC-1: Upsize 3,015LF to 12-in and 18-in	2023	\$831,000
CC-1: Upsize 3,975LF to 12-in and 15-in	2024	\$1,026,000
MC-2: New 9,120LF of 12-in	2025	\$1,576,000
MC-3: New 5,155LF of 24-in	2026	\$1,602,000
CC-2: Upsize 955LF to 12-in and 15-in	2027	\$230,000
WWTP Expansion to 40MGD - PER	2030	\$2,500,000
		<b>\$14,657,000</b>

Table 7 summarizes the status of the Reuse Water System (Impact Fee eligible) Capital Improvement Projects included in the November 2020 Impact Fee Analysis.

**Table 7**

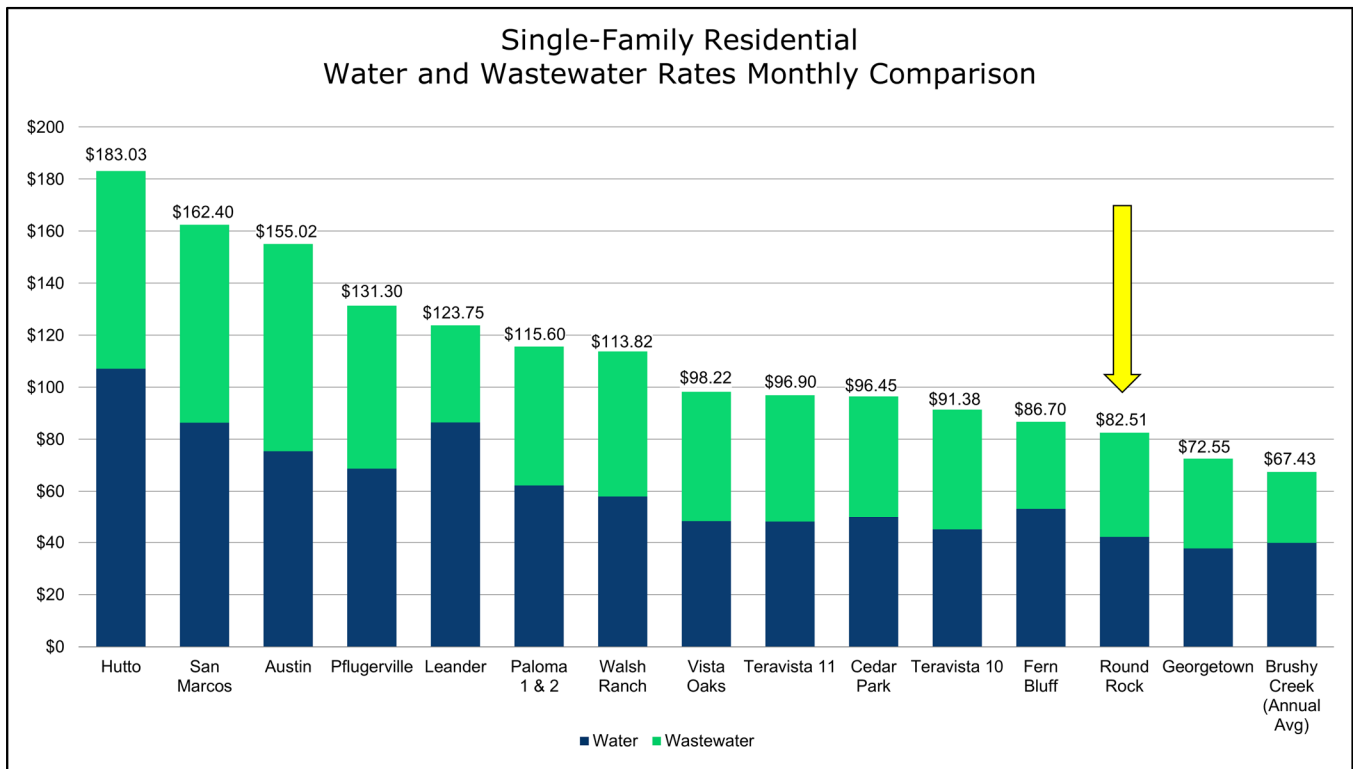

Completed Reuse Projects	Completion	Impact Fee Report Estimated Cost	Actual Cost
Reuse Phase VI	2016	\$900,000	\$900,000
Reuse Phase IV-B	2016	\$3,719,000	\$3,013,152
		<b>\$4,619,000</b>	<b>\$3,913,152</b>

Reuse Projects in Progress	Completion	Impact Fee Report Estimated Cost	Actual Cost
1.0 MG Reuse Ground Storage Tank	2023	\$1,628,400	\$1,628,400
		<b>\$1,628,400</b>	<b>\$1,628,400</b>

Upcoming Reuse Projects	Estimated Completion	Impact Fee Report Estimated Cost
Reuse Phase V – Stony Point High School	2023	\$614,328
		<b>\$614,328</b>

Figure 6 compares Single-Family Residential Utility Rates for Round Rock to surrounding Central Texas Municipalities and Municipal Utility Districts. As depicted, Round Rock utility rates remain among the lowest in the region.

**Figure 6**

\* assumes 10,000 gallons water and 8,000 gallons wastewater used

Table 8 compares Round Rock's Water and Wastewater Impact Fees to surrounding cities and Municipal Utility Districts. Historically, Round Rock had one of the highest total Impact Fees charged for new connections to the water and wastewater systems. However, several surrounding cities have increased their fees over the past few years and surpassed Round Rock. Round Rock's philosophy is for new customers and developments to pay for the required capital improvements due to the growth.

**Table 8**

Area Impact Fee Comparison				
City/Utility	Last Updated	Water	Wastewater	Total
Brushy Creek MUD	2012	\$2,095	\$1,804	\$3,899
<b>Round Rock</b>	<b>2020</b>	<b>\$4,234</b>	<b>\$1,799</b>	<b>\$6,033</b>
Cedar Park	2020	\$3,160	\$3,170	\$6,330
San Marcos	2018	\$3,801	\$2,684	\$6,485
Leander	2017	\$4,309	\$2,820	\$7,129
Austin	2018	\$4,700	\$2,500	\$7,200
Pflugerville	2020	\$7,897	\$1,898*	\$9,795
Georgetown	2018	\$6,921	\$3,115*	\$10,036
Hutto	2021	\$8,832	\$2,788	\$11,620

\*Indicates the City has two different Wastewater Impact Fees, based on service area. The number in the table above reflects the lowest fee charged by that City.

## **CONCLUSION AND RECOMMENDATIONS**

Due to the volatility in growth rates and infrastructure requirements, the City recommends a review of the Impact Fees every three to four years. The current Impact Fees were adopted on January 14, 2021, and went into effect on February 1, 2021.

Over the past several years, the population growth in Round Rock has proceeded slower than projected in the Impact Fee Analysis. However, the number of connections to the water and wastewater systems has occurred as anticipated.

The next Capital Improvements Plan Progress Report will be presented to the CIAC and the City Council in approximately six months.

**Roadway Impact Fee Semi-Annual Report**

**BACKGROUND:**

The City Council approved the Roadway Impact Fee Ordinance on March 14, 2019, with a delayed start in fee collection. The No Fee grace period ended on December 31, 2020, and Phase 1 of fee collection began on January 1, 2021. Staff will present an overview of the Roadway Impact Fee (RIF) program and implementation to date.

This item is the recommendation concerning the semi-annual Roadway Impact Fee report consistent with Section 395.058 of the Texas Local Government Code.

**DATE OF REVIEW:** November 3, 2021

**STAFF REVIEW AND ANALYSIS:**

The City Council approved the Roadway Impact Fee Ordinance on March 14, 2019, with a delayed start in fee collection. The No Fee grace period ended on December 31, 2020, and Phase 1 of fee collection began on January 1, 2021. The RIF was approved with a phased implementation.

- Grace Period No Fee (Building permit before January 1, 2021)
- Phase 1: 30% Residential, 20% Non-Residential (Final Plat before January 1, 2022)
- Phase 2: 45% Residential, 25% Non-Residential (Final Plat before January 1, 2024)
- Phase 3: 60% Residential, 30% Non-Residential (Final Plat on or after January 1, 2024)

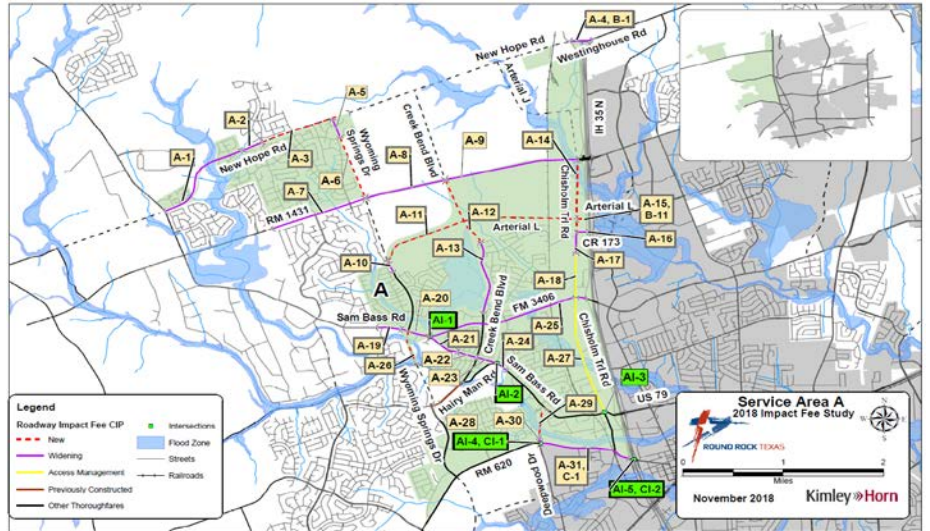

**RECOMMENDED MOTION:**

Recommend approval of the Roadway Impact Fee Semi-Annual Report for presentation to City Council.

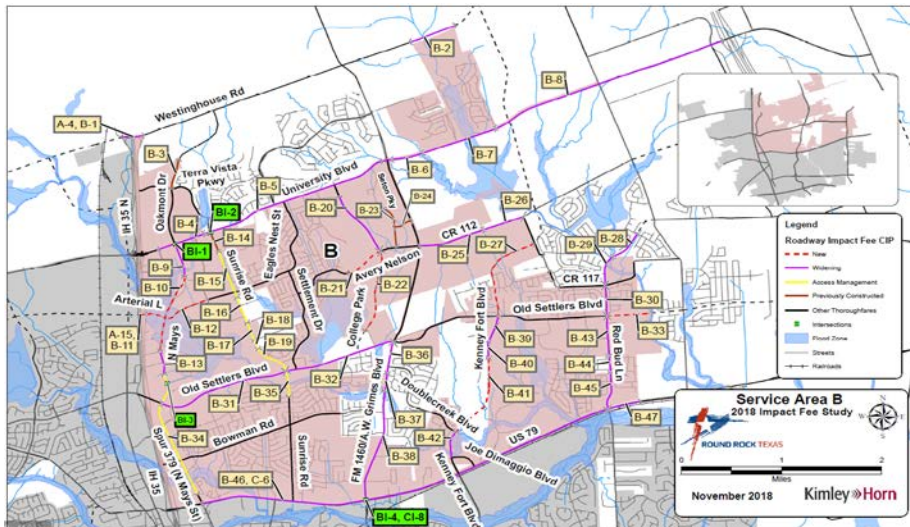

# Roadway Impact Fee Collections

As of September 30, 2021

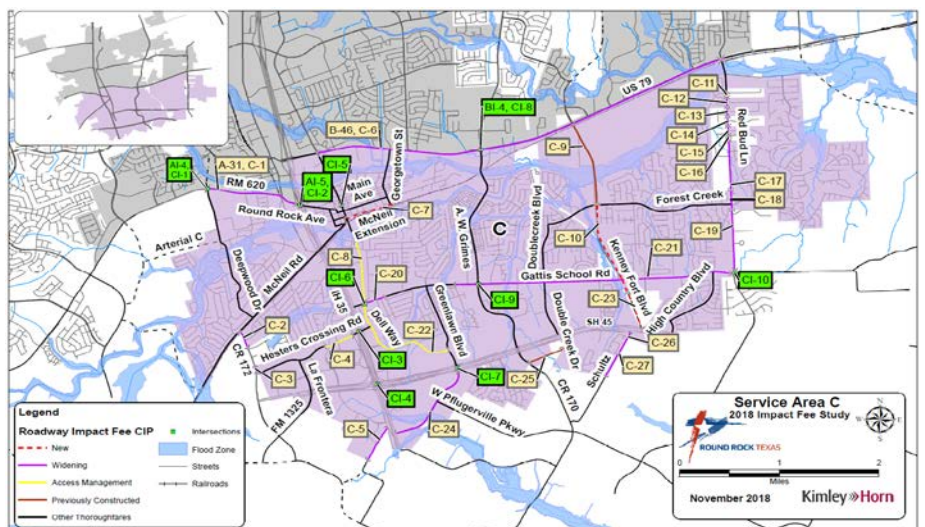

**Service Area A: \$296,215**

**Service Area B: \$1,325,964**

**Service Area C: \$792,711**

## Notes:

Total collections of \$2,414,890.

Service area maps have been updated and are going to Council for approval on 10/14/2021.

Nothing was spent in FY2021.

\$1 million is scheduled to be spent on debt service payments in FY2022.

University Boulevard Widening Project

# Roadway Impact Fee Semi-Annual Report

November 2021

## **SUMMARY**

The Texas Local Government Code Section 395.058 requires the Capital Improvement Advisory Committee (CIAC) to report to the political subdivision the progress of the capital improvements plan and any perceived inequities in implementing the plan or imposing the Roadway Impact Fee. Included herein is the semi-annual report for the reporting period of April 1, 2021, to September 30, 2021, which represents the second half of the City's annual Fiscal Year. The report consists of assessing the implementation of the Roadway Impact Fee, Impact Fee collection and the administrative review process now underway.

The Texas Local Government Code also requires the CIAC to advise the City on updating the land use assumptions, capital improvements plan and Roadway Impact Fees. The Items were first adopted by the City Council in March 2019, with a phased adoption that include collection of fees beginning in January 2021.

## Roadway Impact Fee Adoption

Final adoption of the Roadway Impact Fee occurred on March 14, 2019. The Roadway Impact Fee was adopted with a maximum fee per service unit of \$2,511, which represents the lowest calculated rate across three service areas. With the base service unit, the adoption also limited collection of fees to a percentage of the adopted unit cost over three phases of implementation. Table 1 shows the phasing and percentage of fees collected over the implementation period.

**Table 1: Impact Fee Implementation Phasing**

Phase	Residential Rate (% of Service Unit)	Non- Residential Rate (% of Service Unit)	Implementation Period
Grace Period	No Fee	No Fee	Building permit before January 1, 2021
Phase 1	30%	20%	Final Plat before January 1, 2022
Phase 2	45%	25%	Final Plat before January 1, 2024
Phase 3	60%	30%	Final Plat on or after January 1, 2024

The Roadway Impact Fee is assessed at the recorded plat and collected at the time of building permit issuance.

## Roadway Impact Fee Collection

Roadways Impact Fees are collected, and revenue deposited into accounts for the three service areas identified in the Roadway Impact Fee Study. The Revenue collected to date is presented in Table 2. Those services areas are identified in Figure 1.

**Table 2: RIF Collection April 1, 2021, to September 30, 2021**

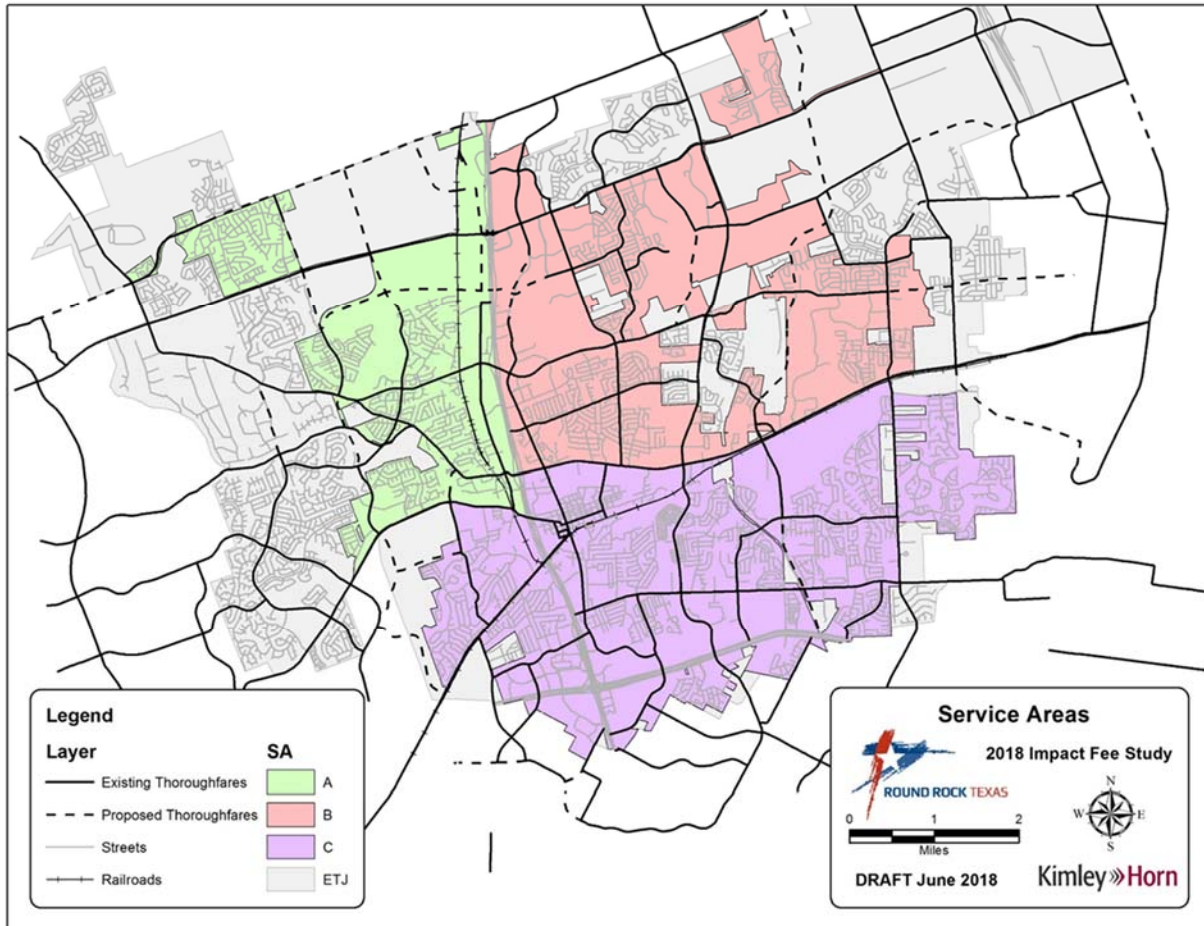

Service Area	Previous Revenue	Revenue April-September 2021	Total Revenue
Service Area A	\$70,852	\$225,363	\$296,215
Service Area B	\$207,587	\$1,118,377	\$1,325,964
Service Area C	\$240,398	\$552,313	\$792,711

Revenue from the first reporting period covered January thru March 2021 during and unprecedented time affected by COVID 19. The current reporting period, April thru September 2021, demonstrated a marked improvement in development along with three additional months of revenue.

On January 1, 2022, Phase 2 of fee implementation will go into effect. Any Final Plat recorded after this date will be subject to an increase in % of Service Unit calculated for the Roadway

Impact fee. Residential rates will increase from 30% to 45% and Non-Residential rates will increase from 20% to 25%.

**Figure 1:RIF Service Areas:**

### Roadway Impact Fee Distribution

Distribution of the RIF collected to Capital Improvement Plan projects is expected to begin in the Fourth Quarter of FY 2021, the first quarter of the new budget year.

The intent of the Roadway Impact Fee process is to capture revenue for a predictable implementation of the future arterial network identified in the Transportation Master Plan. Part of the success of that implementation is in the fact contributions by the development community are captured in Offset Agreements and Consent/Development Agreements. No new Offset Agreements or Consent Development Agreements have been processed in the current reporting period.

## **Administrative Review Process**

City Staff have initiated a review of the *City of Round Rock Roadway Impact Fee Study Adopted March 14, 2019 (Fee Study)* to determine processes for updating Service Area boundaries based on annexations and the creation of an administrative process to include future annexations. A public hearing and comment period is proceeding to adopt changes to the *Fee Study* to capture the newly annexed areas and modify one roadway segment. There will be no impact to the maximum fee calculation or assessable fee, so the adopting ordinance will not be affected.

## **Conclusion and Recommendation**

No significant issues have been identified with Roadway Impact Fee implementation. The Building Inspection, Finance and Transportation Departments provided excellent coordination in operating the program. If required, staff will make future recommendations on an official update to Roadway Impact Fee Ordinance before the March 2024 mandatory update schedule. While updates to the *Fee Study* could occur at any time, staff will continue to attempt to coordinate those with the Semi-Annual Reporting process when annexations into the City Limits occur.

No CIAC action or Council recommendation at this time, the *Fee Study* update is covered as a separate item. The next Roadway Impact Fee and Capital Improvement Plan Progress Report will be presented to the CIAC and the City Council in approximately six months.

## Roadway Impact Fee Study Update

### **BACKGROUND:**

The City Council approved the Roadway Impact Fee Ordinance on March 14, 2019, with a delayed start in fee collection. The Roadway Impact Ordinance was based on the *City or Round Rock, Texas Roadway Impact Fee Study Adopted March 14, 2019 (Fee Study)*.

Section 395.001 (9) of the Texas Local Government Code limits the “Service Area” of roadway facilities to an area within the City Limits. The current fee is based on the City Limits as they existed in late 2018, the time the *Fee Study* was finalized and the adoption process was initiated.

Avery Nelson Parkway from Gulf Way to College Park was included at Project B-21 in the Roadway Impact Fee Capital Improvement Plan in the *Fee Study*. The project has been modified by development within PUD 84 to shift from Avery Nelson Parkway to Wallin Bradley Drive from N. A.W. Grimes Boulevard to Gulf Way.

The proposed changes to the Fee Study are to update the Service Area boundaries to the current City Limits and modify the description of Project B-21 to the Wallin Bradley alignment. The changes to the Fee Study will not affect the Land Use Assumptions, Service Units or Cost Per Service Unit used in Roadway Impact Fee Calculation, therefore will not affect the adopting ordinance of the fee.

**DATE OF REVIEW:** November 3, 2021

### **STAFF REVIEW AND ANALYSIS:**

There are no impacts to the Land Use Assumptions or Methodology for Roadway Impact Fee Calculation. The adoption of the Roadway Impact Fee was completed as a percentage of the maximum fee per service unit and these changes do not affect these percentages.

### **RECOMMENDED MOTION:**

Recommend approval of the amendments to the Roadway Impact Fee Study.

# CITY OF ROUND ROCK, TEXAS ROADWAY IMPACT FEE STUDY DRAFT NOVEMBER 2021

## EXECUTIVE SUMMARY

### Introduction

Impact Fees are a mechanism for funding the public infrastructure necessitated by new development. Across the country, they are used to fund police and fire facilities, parks, schools, roads and utilities. In Texas, the legislature has allowed their use for water, wastewater, roadway and drainage facilities. Since 1989, they have been used to fund public water and wastewater improvements in the City of Round Rock.

In the most basic terms, impact fees are meant to recover the incremental cost of the impact of each new unit of development creating new infrastructure needs. In the case of Roadway Impact Fees, the infrastructure need is the increased capacity on arterial and collector roadways that serve the overall transportation system. The purpose of the 2021 Roadway Impact Fee Study is to identify the fee per unit of new development necessary to fund these improvements in accordance with the enabling legislation, Chapter 395 of the Texas Local Government Code. **The 2021 Update has not identified any changes that affect the fees determined in the 2018 Study as adopted March 2019.**

Impact Fees are a mathematical calculation that determines a maximum impact fee that would be equivalent for growth paying for growth. The Maximum Roadway Impact Fee per Service Unit for Roadway Facilities is considered an appropriate measure of the impacts generated by a new unit of development on the City's Roadway System. An impact fee program is anticipated to be designed so that it is **predictable** for both the development community and City. An impact fee program is **equitable** since similar developments pay a similar fee regardless if they are the first or last to develop. An impact fee program is **transparent**. This report describes in detail how the fee is calculated and how a Capital Improvement Advisory Committee (CIAC) monitors the Impact Fee program. An impact fee program is **flexible** in that funds can be used on priority projects and not just on project adjacent to a specific development. An impact fee program is **consistent** with other City goals and objectives for growth. For example, the actual collection rate set by Council may be determined to be less than the Maximum Roadway Impact Fee to achieve and be in alignment with other City goals and objectives for growth.

## **Impact Fee Basics**

Roadway Impact Fees are determined by several key variables, each described below in greater detail.

### ***Impact Fee Study***

The 2021 Roadway Impact Fee Study is to determine the maximum impact fee per unit of new development chargeable as allowed by the state law. This determination is not a recommendation; the actual fee amount ultimately assessed is at the discretion of the Round Rock City Council, so long as it does not exceed the maximum assessable fee allowed by law. The study looks at a period of 10 years to project new growth and corresponding capacity needs, as required by state law. The study and corresponding maximum fees must be restudied at least every five years. However, the study can be updated at any time to accommodate significant changes in any of the key variables of the impact fee equation.

### ***Service Areas***

A Service Area is a geographic area within which a unique maximum impact fee is determined. All fees collected within the Service Area must be spent on eligible improvements within the same Service Area. For Roadway Impact Fees, the Service Area may not exceed 6 miles. In Round Rock, this restriction necessitated the creation of 3 separate Service Areas. A map of the Service Areas can be found on Page 14.

In defining the Service Area boundaries, the project team considered the corporate boundary (including full and limited purpose jurisdiction), required size limit, adjacent land uses, highway facilities, and topography. Since each Service Area has a unique maximum impact fee, the per-unit maximum fee for an identical land use will vary from one Service Area to the next. For this reason, the team avoided drawing a Service Area boundary through uniform land uses where possible. The 2021 Study update amended these boundaries for areas annexed since the original study.

### ***Land Use Assumptions***

The Impact Fee determination is required to be based on the projected growth and corresponding capacity needs in a 10-year window. This study considers the years 2018-2028. Acknowledging

that the parameters of the study (the corporate boundaries, Transportation Plan, Comprehensive Plan, zoning maps, platting history, etc.) are changing constantly, this study is based on conditions as they were on February 1, 2018. **The 2021 Study Update does not include changes to Land Use Assumptions.**

One of the key elements in the determination of the impact fee is the amount of new development anticipated over 10 years. The residential and non-residential growth projections were performed using the Capital Area Metropolitan Planning Organization (CAMPO) Model projections from the Transportation Master Plan study adopted in 2017.

### ***Roadway Impact Fee Capital Improvements Plan***

The Roadway Impact Fee Capital Improvements Plan (RIF CIP) is distinct and separate from the City's traditional Capital Improvements Plan (CIP). The RIF CIP is a list of projects eligible for funding through impact fees. The City's Transportation Master Plan is the plan for the infrastructure that is estimated to be necessary to accommodate the expected growth. Only those capacity improvements included in the City's Transportation Master Plan are included in the RIF CIP. Capacity improvements may include the addition of lanes, intersection improvements, or the extension of a new road. Resurfacing or other maintenance activities do not qualify as capacity improvements under impact fee law in Texas and cannot be funding with Roadway Impact Fees.

The cost of the RIF CIP is one of the fundamental factors in the calculation of the per-unit maximum impact fee. The RIF CIP's cost was calculated through systematic evaluation of each eligible project. The project team visited each project site to determine the project scope, the presence of any special conditions (such as the need for significant drainage improvements or railroad crossings) and whether various additional construction costs were applicable (such as costing for significant grades). In determining project limits, the team identified roadway segments with uniform need. For Example, Wyoming Springs Drive has a portion with half of a 4-lane divided built from Blue Ridge Drive to the future alignment of New Hope Drive, while the remainder south to RM 1431 is a new alignment. These were split as two separate projects based on uniform need. Developing unit costs from recently City bid projects and TxDOT moving average bid prices, uniform costs were determined for the major items of work, additional construction items, and project delivery costs. Section III provides

a listing of the 10-Year RIF CIP by service area in Tables 3.A – 3.C and maps of the RIF CIP by service area in Exhibits 4.A – 4.C. Finally, detailed cost projections by project can be found in Appendix A. It should be noted that these cost projections are based on conceptual level planning, and are subject to refinement upon final design.

Only those projects listed in the RIF CIP are eligible to utilize impact fee funds. In order to optimize future flexibility, all capacity improvements included in the Transportation Master Plan are included in the RIF CIP and will be eligible to utilize impact fee funds. In some cases, an interim project designation was used due to the ultimate build out not being needed in the 10-year window. An example of this is University Boulevard east of A.W. Grimes Boulevard, which is shown as a 4-lane divided road widening in the RIF CIP, but ultimately will be built out to a 6-lane divided road based on the Transportation Master Plan.

Only the costs associated with providing the additional capacity at an anticipated level of service D necessitated by 10 years of growth can be used to calculate the maximum impact fee. To calculate the maximum impact fee, the total cost of the RIF CIP at build-out was reduced to account for (1) the portion of new capacity that will address existing needs, (2) the portion of new capacity that will not be necessitated until beyond the 10-year growth window, and (3) contributions already made by current developments. A ratio that compares 10 years' demand for capacity to the net supply of capacity (total new capacity in the RIF CIP minus existing needs) can be calculated. That ratio, which may not exceed 100%, is then applied to the cost of the net capacity supplied. The result is a determination of the costs attributable to the next 10 years' growth, which is then used to calculate the maximum impact fee in accordance with state law. The result is known as the recoverable cost of the RIF CIP.

### ***Service Unit***

The "service unit" is a measure of consumption or use of the capital facilities by new development. In other words, it is the unit of measure used in the 2021 Roadway Impact Fee Study to quantify the supply and demand for roads in the City. For transportation purposes, the service unit is defined as a vehicle-mile. Below is the definition for vehicle-mile. A vehicle-mile is the capacity consumed in a

single lane in the PM peak hour by a vehicle making a trip one mile in length. The PM Peak is used as the basis for transportation planning and the estimation of trips caused by new development.

### ***Impact Fee Calculation***

In simplest terms, the maximum impact fee allowable by law is calculated by dividing the recoverable cost of the RIF CIP by the number of new service units of development. In accordance with state law, both the cost of the RIF CIP and the number of new service units of development used in the equation are based on the growth and corresponding capacity needs projected to occur within a 10-year window. This calculation is performed for each service area individually; each service area has a stand-alone RIF CIP and 10-year growth projection.

In practice, there are many factors that complicate this calculation. The maximum impact fee allowable by law for each service area is calculated in **Table 8**. A detailed discussion of the calculation precedes Table 8, found on Page 40.

### ***Collection and Use of Roadway Impact Fees***

Roadway Impact fees are assessed when a final plat is recorded. The assessment defines the impact of each unit at the time of platting, according to land use, and may not exceed the maximum impact fee allowed by law. An existing plat would be assessed at the adoption of the ordinance and would be exempt from impact fees for one year. Roadway Impact Fees are collected when a building permit is issued. Therefore, funds are not collected until development-impacts are introduced to the transportation system. Funds collected within a service area can be used only within the same service area. Finally, fees must be utilized within 10 years of collection in the designated service area, or must be refunded with interest. Fees should be utilized in a first in, first out basis.

### ***Adoption Process***

Chapter 395 of the Texas Local Government Code stipulates a specific process **for the amendment or update of Roadway Impact Fee Studies**. A Capital Improvements Advisory Committee (CIAC) is required to review **amendments to** the Land Use Assumptions, RIF CIP used in calculating the maximum fee, and to provide the Committee's findings for consideration by the City Council. The

composition of the CIAC is required to adequately represent the building and development communities. The City Council then conducts a public hearing on the updated Land Use Assumptions, RIF CIP and Impact Fee Ordinance. One public hearing is required for the 2021 Roadway Impact Fee study update.

Following policy adoption, the CIAC is tasked with advising the City Council of the need to update the Land Use Assumptions or the RIF CIP at any time within five years of adoption. Finally, the CIAC oversees the proper administration of the Impact Fee, once in place, and advises the Council as necessary.

### ***2021 Roadway Impact Fee Study Results***

Below is the listing of the 2021 Roadway Impact Fee Study's Maximum Assessable Impact Fee Per Service Unit (Vehicle-Mile), unchanged from the originally adopted study from March 2019:

Service Area	Maximum Fee Per Service Unit (per Vehicle-Mile)
A	\$2,678
B	\$2,933
C	\$2,511

## I. INTRODUCTION

Chapter 395 of the Texas Local Government Code describes the procedure political subdivisions must follow to create and implement impact fees. Chapter 395 defines an Impact Fee as “a charge or assessment imposed by a political subdivision against new development to generate revenue for funding or recouping the costs of capital improvements or facility expansions necessitated by and attributable to the new development.”

The City has retained Kimley-Horn and Associates, Inc. to provide professional transportation engineering services for the 2021 Roadway Impact Fee Study. This report includes details of the Roadway Impact Fee calculation methodology in accordance with Chapter 395, the applicable Land Use Assumptions, development of the Roadway Impact Fee RIF CIP, and the Land Use Equivalency Table.

This report references two of the basic inputs to the Roadway Impact Fee:

- 1) **Land Use Assumptions** (Pg. 9)
- 2) **Roadway Impact Fee Capital Improvements Plan (RIF CIP)** (Pg. 16)

Information from these Land Use Assumptions and RIF CIP is used extensively throughout the remainder of the report.

There is a detailed discussion of the methodology for the computation of impact fees. This discussion is broken into three components:

- 1) **Methodology for Roadway Impact Fees** (Pg. 23)
- 2) **Roadway Impact Fee Calculation** (Pg. 39)
- 3) **Plan for Financing and the Ad Valorem Tax Credit** (Pg. 42)

The components of the **Computation Method for Roadway Impact Fee** include development of:

- Service Areas (Pg. 24)
- Service Units (Pg. 24)
- Cost Per Service Unit (Pg. 26)
- RIF CIP Costing Methodology (Pg. 26)
- Summary of RIF CIP Costs (Pg. 30)
- Service Unit Calculation (Pg. 34)

The Roadway Impact Fee is then calculated as:

- Maximum Assessable Impact Fee Per Service Unit (Pg. 40)
- Service Unit Demand Per Unit of Development (Pg. 48)

The report also includes a section concerning the **Plan for Financing and the Ad Valorem Tax Credit**. This involves the calculation of the applicable credit required by law to offset the City's use of ad valorem taxes to help fund the RIF CIP. This plan, prepared by NewGen Strategies, and upon which we relied, details the maximum assessable impact fee per service unit the City of Round Rock may apply under Chapter 395 of the Texas Local Government Code. **This plan is unchanged from the original study adopted March 2019.**

## II. LAND USE ASSUMPTIONS

### A. Purpose and Overview

In order to assess an impact fee, Land Use Assumptions must be developed to provide the basis for residential and employment growth projections within a municipality. As defined by Chapter 395 of the Texas Local Government Code, these assumptions include a description of changes in land uses, densities, and development in the service area. The land use assumptions are then used in determining the need and timing of transportation improvements to serve future development.

This report documents the process used to develop the Land Use Assumptions for the City of Round Rock's Roadway Impact Fee (RIF) study. In accordance with Chapter 395 of the Texas Local Government Code, roadway impact fees must be calculated based on reasonable expectations of residential and employment growth within the next ten years (2018 – 2028).

Information from the following sources was compiled to complete the Land Use Assumptions, unchanged from the study adopted March 2019:

- Transportation Master Plan 2017 Update
- CAMPO 2040 Plan
- City of Round Rock Historical Building Permit Data 2013-2017
- City of Round Rock staff
- Current planned development projects
- Parks and Trails System map

This Land Use Assumptions Summary includes the following components:

- **Land Use Assumptions Methodology** – An overview of the general methodology used to generate the land use assumptions.
- **Roadway Impact Fee Service Areas** – Explanation of the division of Round Rock into service areas for roadway and infrastructure facilities.
- **Residential and Employment Growth** – Data on residential and employment growth within the service area over the next ten years (2018 – 2028).
- **Land Use Assumptions Summary Table** – A synopsis of the Land Use Assumptions.

The residential and employment estimates and projections were compiled in accordance with the following categories:

*Units:* Number of dwelling units, both single and multi-family.

*Employment:* Square feet of building area based on three (3) different classifications. Each classification has unique trip making characteristics.

Retail: Land use activities which provide for the retail sale of goods which primarily serve households and whose location choice is oriented toward the household sector, such as grocery stores and restaurants.

Service: Land use activities which provide personal and professional services, such as government and other professional offices.

Basic: Land use activities that produce goods and services such as those which are exported outside of the local economy, such as manufacturing, construction, transportation, wholesale, trade, warehousing, and other industrial uses.

The above categories in the Land Use Assumptions match those used to develop the travel demand model for the City of Round Rock. These broader categories are used in the development of the assumptions for impact fees; however, expanded classifications used in the assessment of impact fees are found in the Land Use / Vehicle-Mile Equivalency Table (Pg. 50).

## **B. Land Use Assumptions Methodology**

The residential and non-residential growth projections formulated in this report were performed using reasonable and generally accepted planning principles. The following factors were considered in developing these projections:

- Character, type, density, and quantity of existing development;
- Emerging Projects;
- Growth trends;
- Location of vacant land;
- Physical restrictions (i.e. flood plains, railroads); and
- Carrying Capacity (Growth Potential) of the City of Round Rock.

Determination of the ten-year growth within the Roadway Impact Fee study area was accomplished through two general steps:

- **Step 1: Determine Base Year (2018)**
- **Step 2: Determine 10-Year Growth Projections**

### **Step 1: Determine Base Year (2018)**

Traffic Analysis Zone (TAZ) data obtained from the CAMPO 2040 model was used to determine the 2018 residential units and employment square footage.

Residential units and basic, retail, and service employment data were interpolated to the year 2018 based on the 2010 base year and 2040 future year data in the CAMPO model. A conversion of square footage per employee was utilized to determine the number of units for non-residential land uses based on *ITE Trip Generation Manual*. Residential units were broken out into a split of 60% multifamily units and 40% single family units based on historical data from 2013 to 2017 in the City of Round Rock.

## **Step 2: Determine 10-Year Growth Projections**

The CAMPO 2040 model was also used to determine carrying capacity using the same methodology as the 2018 base year. Growth rates for 2010 to 2040 were applied to the 2018 base year to determine growth for the City of Round Rock over the next 10 years to 2028. Growth rates for employment were converted to square footage using typical figures for employees per 1,000 square feet for each employment type. The growth rates for both residential and non-residential (employment) were then applied to the 2018 base year estimates and projected 10 years into the future to 2028. Finally, the 2028 projections were compared to historical building permit data from 2011 to 2017 to calibrate growth projections from the CAMPO 2040 Model and validate the 10-year growth assumptions.

From 2013 to 2017, 4,618 dwelling units were constructed and approximately 9,700,000 square feet of non-residential space was constructed in the City of Round Rock. The average of the historical trends (assuming growth rate for 5 years from 2013 to 2017 continues from 2018 to 2028) and the CAMPO 2040 Model were used to determine growth projections. Finally, planned large projects were also added to the average of the CAMPO 2040 Model and historical trends to further calibrate the Land Use Assumptions shown in **Table 1**.

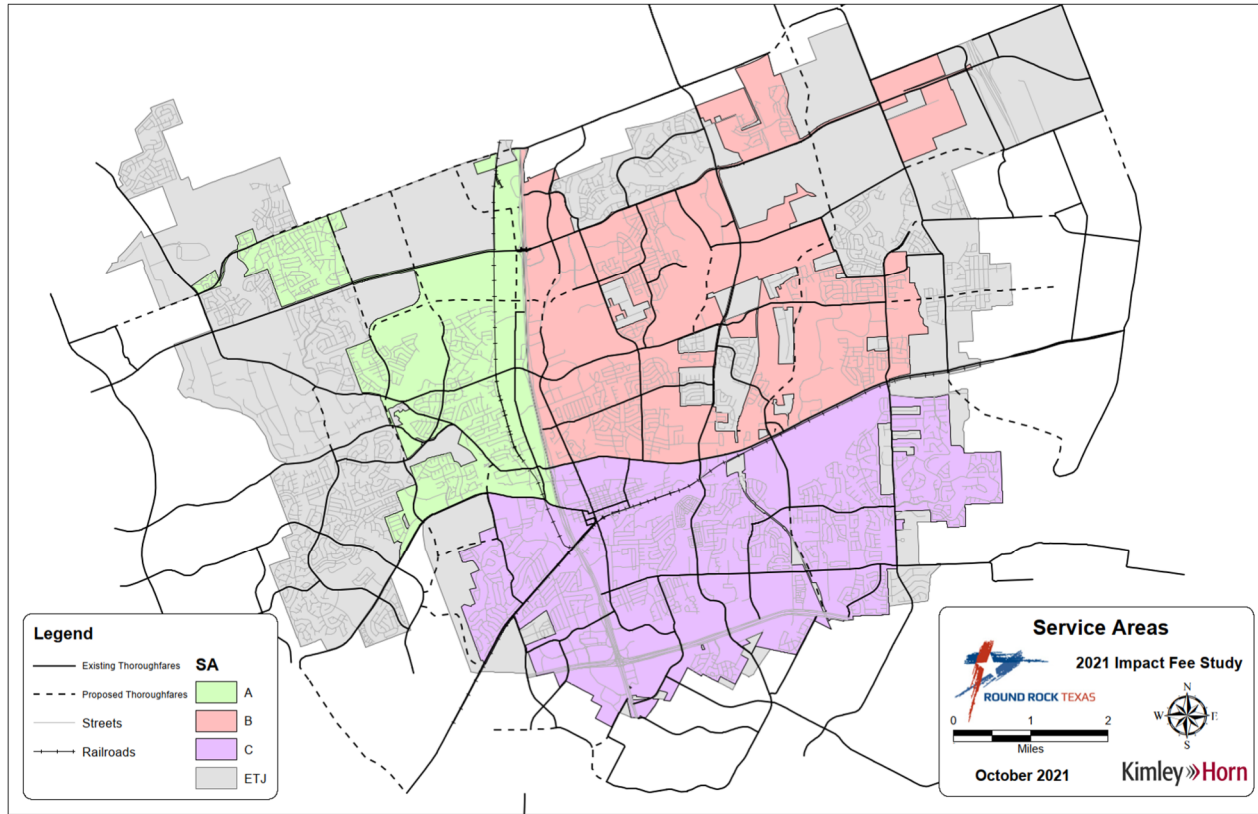

### C. Roadway Impact Fee Service Areas

The geographic boundary of the proposed impact fee service areas for transportation facilities is shown in **Exhibit 1**. The City of Round Rock is divided into three (3) service areas, each based upon the six (6) mile limit, as required in Chapter 395. For transportation facilities, the service areas as required by state law are limited to areas within the current corporate City limits. In defining the Service Area boundaries, the project team considered the corporate boundary, required six (6) mile size limit, adjacent land uses, highways and topography. Since each Service Area will have a unique maximum impact fee, the per-unit maximum fee for an identical land use will vary from one Service Area to the next. For this reason, the team kept areas of uniform land use within the same Service Area where possible.

It should be noted that at locations where Service Area boundaries align with a City roadway, the proposed boundary is intended to follow the centerline of the roadway, unless otherwise noted. In cases where a Service Area boundary follows the City Limits, only those portions of the transportation facility within the City Limits are included in the Service Area.

Service Area boundaries were changed from the study adopted March 2019 to reflect the City Limits current as of October 2021 in the 2021 Study Update.

## Exhibit 1 – Proposed Service Areas

## D. Land Use Assumptions Summary

**Table 1** summarizes the residential and employment 10-year growth projections. The growth projections are unchanged from the study adopted March 2019.

**Table 1. Residential and Employment 10-Year Projections**

Service Area	Year	Residential (Units)		Employment (Sq. Ft.)			
		Single Family	Multi-Family	Basic	Service	Retail	Total
A	2018-2028	621	932	1,300,000	600,000	500,000	2,400,000
B		1,826	2,739	600,000	2,300,000	900,000	3,800,000
C		1,720	3,485	2,200,000	2,600,000	1,500,000	6,300,000
Total		4,167	7,156	4,100,000	5,500,000	2,900,000	12,500,000

### III. ROADWAY IMPACT FEE CAPITAL IMPROVEMENTS PLAN

The City has identified the transportation projects needed to accommodate the projected growth within the City. The City's Transportation Master Plan is the plan for the infrastructure that is estimated to be necessary to accommodate the expected growth. The Roadway Impact Fee Capital Improvements Plan (RIF CIP) consists of 5 categories of projects. They are as follows:

- **Previously Constructed** – Identified corridors that were previously constructed and have access capacity for future development to utilized.
- **Widening** – Existing roadways not currently built to the ultimate class in the Transportation Master Plan and must be completely reconstructed
- **½ Widening** – Existing roadways that have built half of a 4-lane or 6-lane divided roadway previously and only need one side of the roadway to be built
- **Access Management** – Existing 5 lane undivided roadways identified for median construction in the existing center turn lane for access management purposes.
- **New** - All future roadways needed to complete the Transportation Master Plan

The RIF CIP includes arterial class roadway facilities, collector facilities as well as major intersection improvements. All the roadway facilities identified are included in the Transportation Master Plan except for some roadway alignment modifications due to city direction. Through evaluation of the Transportation Master Plan with City staff, some facilities were identified that were upgraded or downgraded from their functional classification to reflect capacity need in a 10-year window.

Major intersection improvements were identified in the Transportation Master Plan. Some improvements were left off because they did not specify capacity improvements, and some were added based on field observed need and confirmation from city staff. Improvements were categorized as follows:

- **Signal** – either a new signal or modification to an existing signal due to construction of a new roadway approach to an existing signalized intersection
- **Intersection Improvement** – construction of an intersection improvement to be determined after complete analysis
- **Turn Lanes** – addition or extension of a turn lane consistent with City, TxDOT and NCHRP Report 780 turn lane length recommendations.
- **Other** – a catch-all for other improvements, limited to new turn lanes, bond project recommendations not in the other 3 categories, removing split phasing at intersections, and special intersections (Continuous Flow Intersections (CFI), Diverging Diamond Intersections (DDI), or grade separation improvements)
- **Update ITS and Traffic Management Infrastructure** – This item was identified in the Transportation Master Plan and was split evenly between the three (3) service areas for developing the roadway impact fee.

All intersection improvement recommendations are recommended to undergo a design level evaluation before implementation to ensure the most appropriate improvements are made. In the case where a design level evaluation determines improvements contrary to the RIF CIP, such as turn lane improvements in place of a signal, the RIF CIP cost allocated to the intersection may still be applied to the alternate improvements.

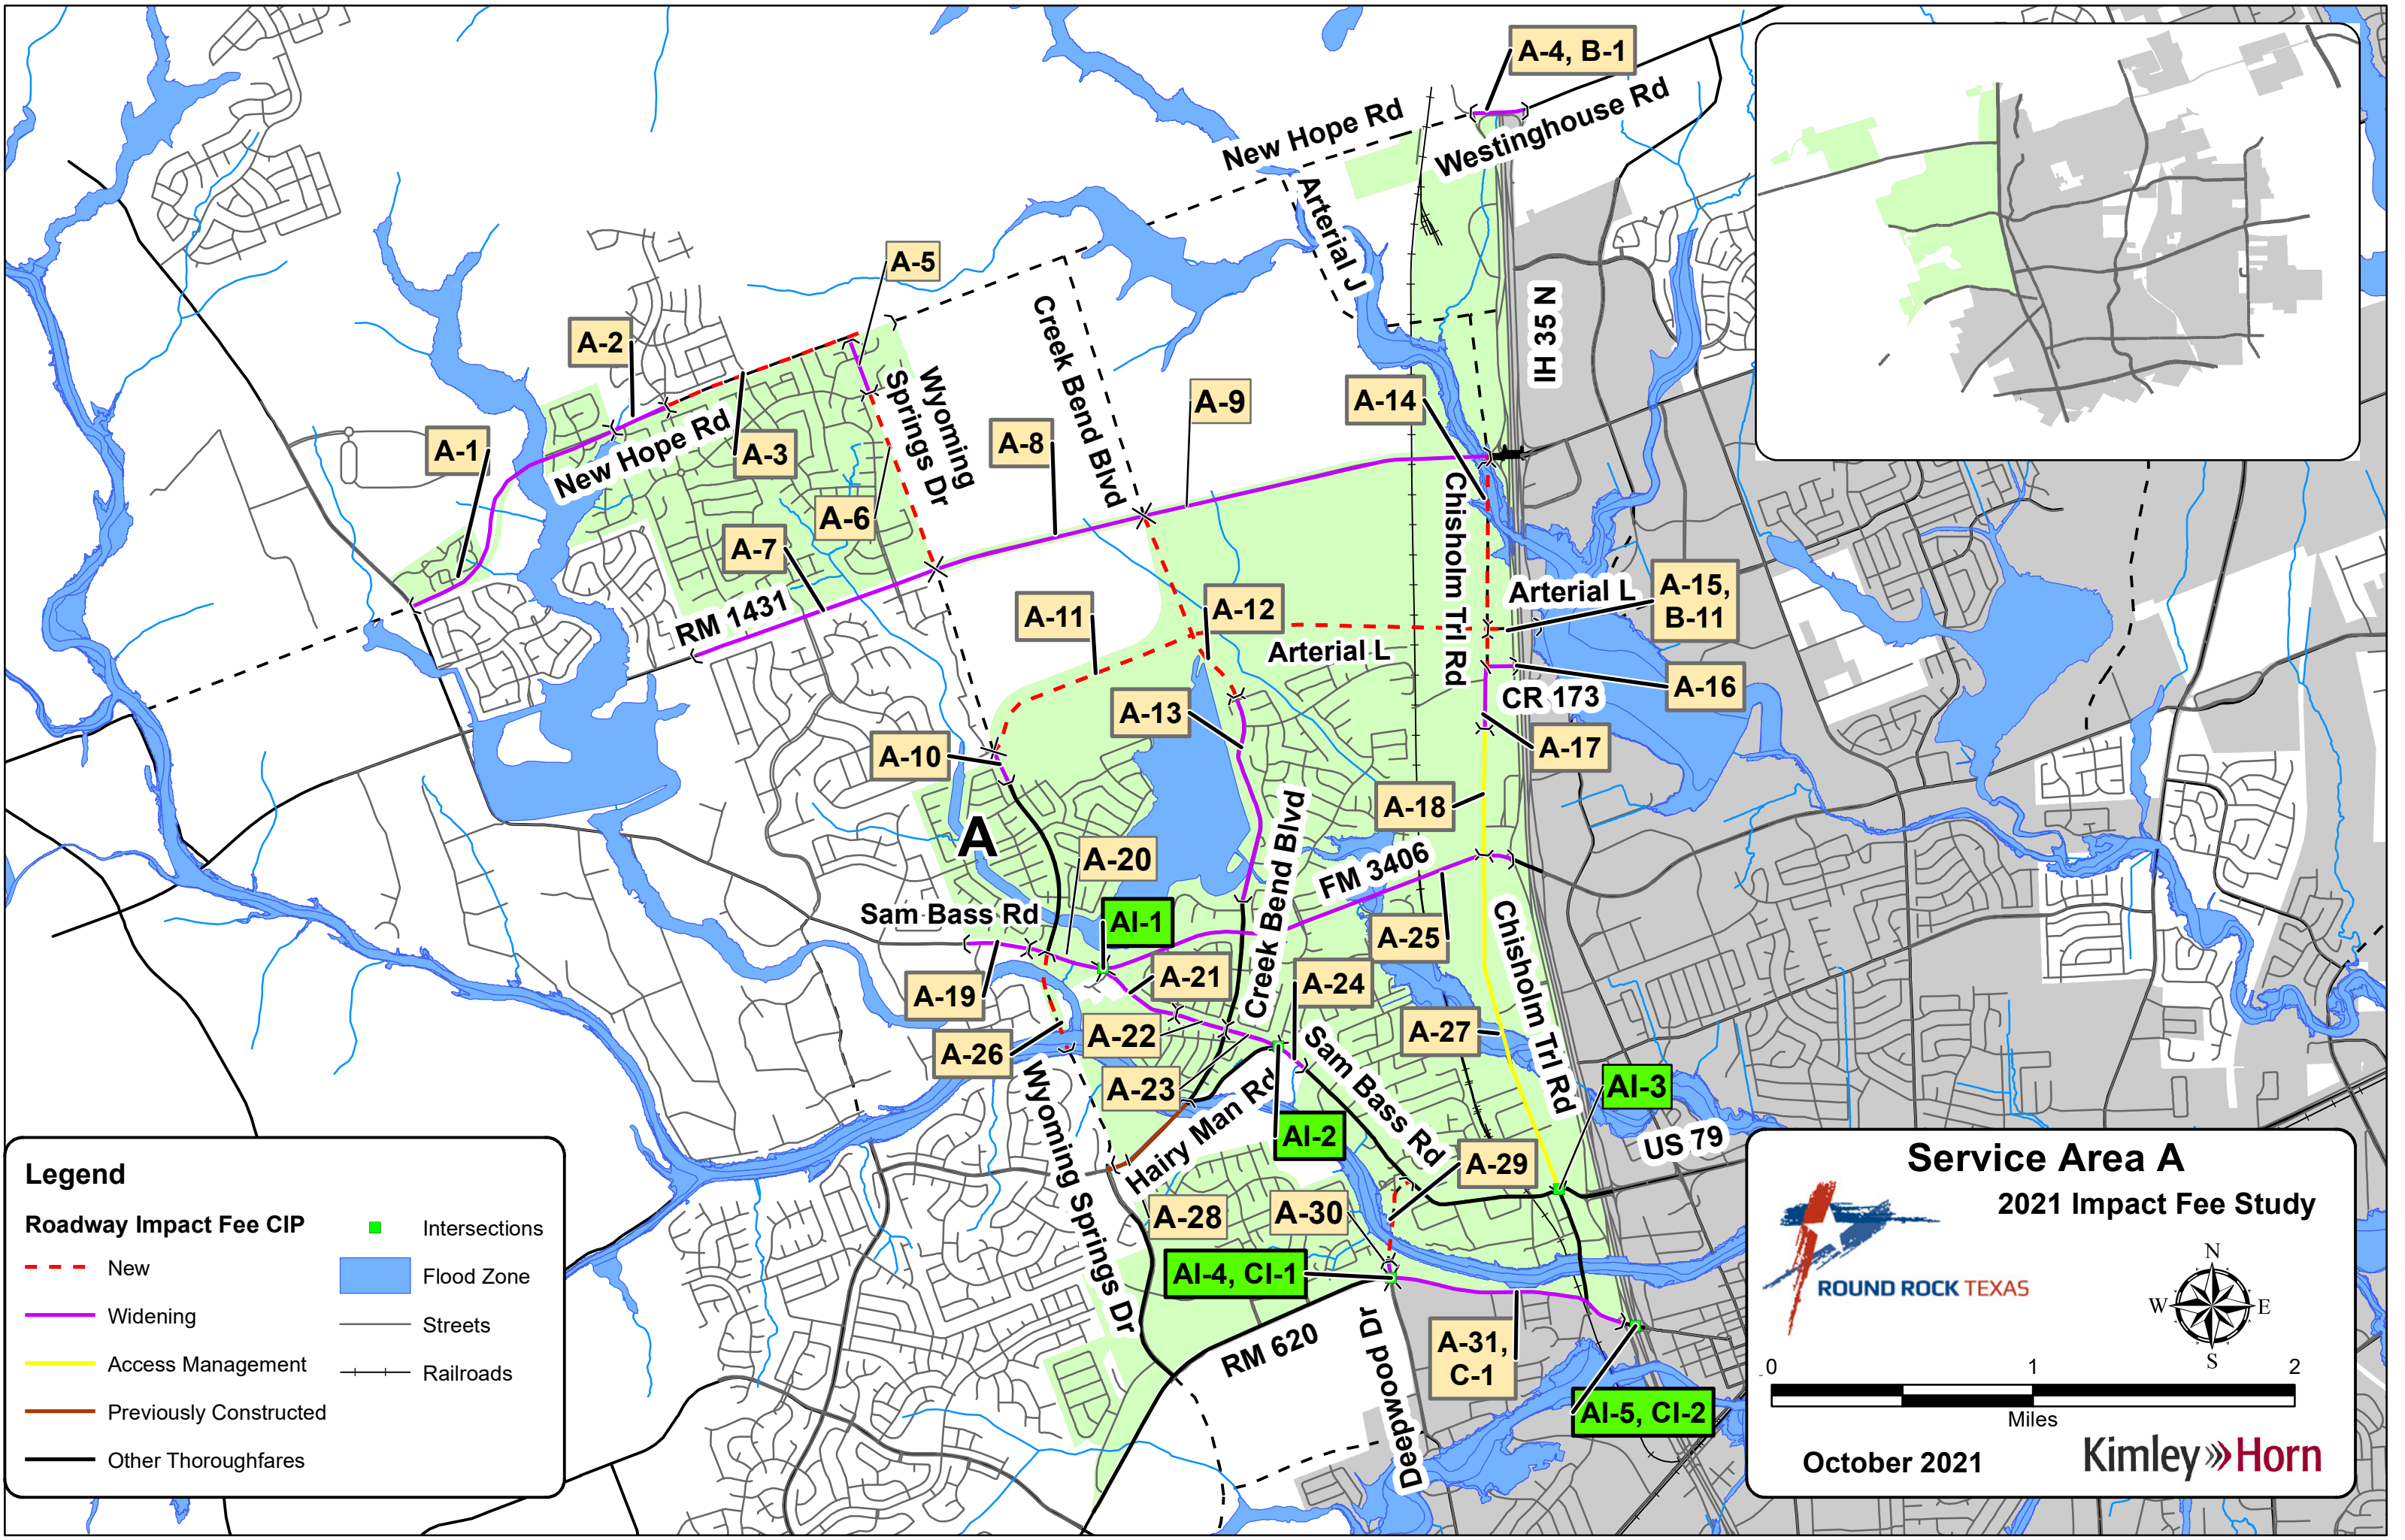

The proposed RIF CIP is listed in **Tables 2.A – 2.C** and mapped in **Exhibits 2.A – 2.C**. The tables show the length of each project as well as the facility's typology. The RIF CIP was developed in conjunction with input from City of Round Rock staff and represents projects that will be needed to accommodate the growth projected in the Land Use Assumptions section of this report. The only change to the RIF CIP in the 2021 Study Update is the exchange of project B-21 from Avery Nelson to Wallin Bradley.

**Table 2.A. 10-Year Roadway Impact Fee Capital Improvements Plan – Service Area A**

Service Area	Proj. #	IF Class	Roadway	Limits	Length (mi)	% In Service Area
SA A	A-1	4 Lane - Enhanced (1/2)	New Hope Rd (1)	Sam Bass Rd to 240' W of Lagoon Dr	1.10	100%
	A-2	4 Lane - Enhanced (1/2)	New Hope Rd (2)	240' W of Lagoon Dr to Mayfield Ranch Blvd	0.23	50%
	A-3	4 Lane - Proposed	New Hope Rd (3)	Mayfield Ranch Blvd to 1000' E of Wyoming Springs Dr	0.93	50%
	A-4, B-1	6 Lane - Enhanced	Westinghouse Rd	IH 35 SBFR to IH 35 NBFR	0.19	50%
	A-5	4 Lane - Enhanced (1/2)	Wyoming Springs Dr (1)	New Hope Dr (Future) to Blue Ridge Dr	0.23	100%
	A-6	4 Lane - Proposed	Wyoming Springs Dr (2)	Blue Ridge Dr to RM 1431	0.72	100%
	A-7	6 Lane - Enhanced	RM 1431 (1)	1100' W of Mayfield Ranch Blvd to 850' E of Stone Oak Dr	0.97	50%

2021 Impact Fee Study

October 2021

**Kimley»Horn**

## IV. METHODOLOGY FOR ROADWAY IMPACT FEES

### A. Service Areas

The three (3) service areas used in the 2021 Roadway Impact Fee Study are shown in the previously referenced **Exhibit 1**. These service areas cover the entire corporate area of the City of Round Rock (both limited and full purpose jurisdictions) **as of October 2021**. Chapter 395 of the Texas Local Government Code specifies that “the service area is limited to an area within the corporate boundaries of the political subdivision and shall not exceed six (6) miles.” The service areas in the 2018 Roadway Impact Fee Study are consistent with the specification of Chapter 395 of the Texas Local Government Code.

### B. Service Units

The “service unit” is a measure of consumption or use of the capital facilities by new development. In other words, it is the unit of measure used in the 2021 Roadway Impact Fee Study to quantify the supply and demand for roads in the City. For transportation purposes, the service unit is defined as a vehicle-mile. Below is the definition for vehicle-mile.

Vehicle-Mile: The capacity consumed in a single lane in the PM peak hour by a vehicle making a trip one mile in length. The PM Peak is used as the basis for transportation planning and the estimation of trips caused by new development.

Total Vehicle-Miles of Supply: Based on the total length (miles), number of lanes, and capacity (vehicles per hour) provided by the Transportation Master Plan (see **Appendix B**).

Total Vehicle-Miles of Demand: Based on the 10-year growth projections (Pg. 38). The demand is equal to PM Trip Rate (trips) \* Trip Length (miles).

The capacity values used in the 2021 Roadway Impact Fee Study are based upon Capacity Criteria published by the Capital Area Metropolitan Planning Organization (CAMPO) and modified to accommodate different contexts within the City of Round Rock corporate limits. This capacity represents an approximate level of service D. **Table 3A** and **3B** show the service volumes as a function of the facility classification and type.

**Table 3A. Service Volumes for Proposed Facilities  
(used in Appendix B – Roadway Impact Fee CIP Service Units of Supply)**

<b>Facility Classification</b>	<b>Lanes</b>	<b>Median Configuration</b>	<b>Hourly Vehicle-Mile Capacity per Lane-Mile of Roadway Facility</b>
<b>6 Lane</b>	6	Divided	900
<b>4 Lane Proposed</b>	4	Divided	810
<b>3 Lane Proposed</b>	3	Undivided	410
<b>2 Lane Existing</b>	2	Undivided	410

**Table 3B. Service Volumes for Existing Facilities**

<b>Roadway Type</b>	<b>Description</b>	<b>Hourly Vehicle-Mile Capacity per Lane-Mile of Roadway Facility</b>
<b>2U-G</b>	Rural Cross-Section (i.e., gravel, dirt, etc.)	100
<b>2U-H</b>	Two lane undivided – rural setting, high speed	770
<b>2U</b>	Two lane undivided – built-out	410
<b>2U-OP</b>	Two lane undivided with on-street parking	330
<b>2U-Half</b>	Two lane undivided – half of a 4 lane divided	410
<b>3U</b>	Three lane undivided (two-way, left-turn lane)	510
<b>3U-OP</b>	Three lane undivided with on street parking	410
<b>4U</b>	Four lane undivided	680
<b>4D</b>	Four lane divided	810
<b>5U</b>	Five lane undivided	770
<b>6U</b>	Six lane undivided	770
<b>6D</b>	Six lane divided	900
<b>7U</b>	Seven lane undivided	860

### **C. Cost Per Service Unit**

A fundamental step in the impact fee process is to establish the cost for each service unit. In the case of the Roadway Impact Fee, this is the cost for each vehicle-mile of travel. Thus, it is the cost to construct a roadway (lane-mile) needed to accommodate a vehicle-mile of travel. The cost per service unit is calculated for each service area based on the roadway projects within that service area.

The second component of the cost per service unit is the determination of the number of service units in each service area. This number is the measure of the growth in transportation demand that is projected to occur in the ten-year period.

### **D. Cost of the RIF CIP**

All of the project costs for an arterial or collector facility which serves the overall transportation system are eligible to be included in the Roadway Impact Fee Capital Improvements Plan (RIF CIP). Chapter 395 of the Texas Local Government Code specifies that the allowable costs are "...including and limited to the:

1. Construction contract price;
2. Surveying and engineering fees;
3. Land acquisition costs, including land purchases, court awards and costs, attorney's fees, and expert witness fees; and
4. Fees actually paid or contracted to be paid to an independent qualified engineer or financial consultant preparing or updating the capital improvements plan who is not an employee of the political subdivision."

The engineer's opinion of the probable costs of the projects in the RIF CIP is based, in part, on the calculation of a unit cost of construction. This means that a cost per linear foot of roadway is calculated based on an average price for the various components of roadway construction. This allows the probable cost to be determined by the type of facility being constructed, the number of lanes, and the length of the project. The cost for location specific items such as bridges, highway ramps, drainage structures, and any other special components are added to each project, as appropriate. The following is a detailed description of the costing worksheet/methodology for the RIF CIP.

## 1. Overview of RIF CIP Costing Worksheets

For each project a specific costing worksheet was developed (see **Appendix A**). Each worksheet contained the following four (4) main components:

- Project Information,
- Construction Pay Items,
- Construction Component Allowances and
- Summary of Costs and Allowances

City of Round Rock

ROW/Easement Acquisition:	Existing Alignment	15%	\$ 660,000
Impact Fee Project Cost TOTAL:		\$	5,800,000

NOTE: The planning level cost projections listed in this appendix have been developed for Impact Fee calculations only and should not be used for any future Capital Improvement Planning within the City of Round Rock.

The planning level cost projections shall not supersede the City's design standards contained or the determination of the City Engineer for a specific project.

NOTE: The planning level cost projections listed in this appendix have been developed for Impact Fee calculations only and should not be used for any future Capital Improvement Planning within the City of Round Rock. The planning level cost projections shall not supersede the City's design standards contained or the determination of the City Engineer for a specific project.

## 2. Project Information

In order to correctly estimate the cost of a roadway project, several attributes are first identified:

- Project Number – Identifies which Service Area the project is in with a corresponding number. The corresponding number does not represent any prioritizations and is used only to identify projects. For example, Project A-9 is in Service Area A and is the 9<sup>th</sup> project on the list.
- Name – A unique identifier for each project. In some cases, abbreviations are used for the project name.
- Limits – Represents the beginning and ending location for each project.
- Service Area(s) – Represents the service areas where the project is located. Multiple service areas will be listed if the project lies along a service area boundary.
- Impact Fee Class – The costing class to be used in the analysis. The impact fee class provides the width for the various elements in the roadway. The construction costs are variable, based on the Transportation Master Plan classification of the roadway. Modification to roadway element widths are utilized in cases where a portion of the facility currently exists and the road is only to be widened, or where the road is planned to be widened to an interim configuration. Examples of these are access management projects, median widening projects (widening that occurs in an existing median), and are designated in the summary sheets at the beginning of each service area's Conceptual Level Cost Projections in **Appendix A**. Other specialized cases are noted in the short description box located in this section
- Ultimate Class – the ultimate classification of the roadway, if different from the Impact Fee Class based on determination of need in the 10-year window
- Length (ft) – The distance measured in feet that is used to cost out the project.

### **3. Construction Pay Items**

A typical roadway project consists of several costs, including the following: planning, survey, design engineering, permitting, right-of way acquisition, and construction and testing. While the construction cost component of a project may consist of approximately 100 various pay items, a simplified approach was used for developing the conceptual level project costs. The pay items used in the 2018 RIF CIP are as follows:

- Unclassified street excavation;
- HMAC Surface courses (asphalt, in depth);
- Flexible roadway base;
- Lime stabilized subgrade;
- Surface treated prime coat;
- Concrete sidewalks;
- Concrete curb and gutter; and
- Turn lanes and median openings.

### **4. Construction Component Allowances**

A percentage of the paving construction cost is allotted for various major construction component allowances, as appropriate. These allowances include traffic control, pavement markings, signs and posts, roadway drainage, illumination, water and sewer adjustments, turf and erosion control, landscaping and irrigation, mobilization, and preparation of right-of-way. These allowance percentages are also based on historical data.

In addition, lump sum dollar allowances are provided for special drainage structures (bridges and culverts) and railroad crossings. The paving and allowance subtotal is given a fifteen percent (15%) contingency.

## 5. Summary of Cost and Allowances

To determine the total Impact Fee Project Cost, sixteen percent (16%) of the construction cost total is added for engineering, surveying, and testing. Percentages are also allotted ROW/easement acquisition in the amount of ten percent (10%) for TxDOT roadways and access management projects, fifteen percent (15%) for existing roadway alignments with widening, and thirty percent (30%) for new roadway alignments.

The Impact Fee Project Cost Total is then the Construction Cost Total plus engineering, surveying, and testing; plus contingency, plus ROW/easement acquisition; and minus roadway escrow agreements.

### E. Summary of Roadway Impact Fee CIP Costs

**Tables 4.A – 4.C** are the 10-Year RIF CIP project lists for each service area with planning level project costs. Individual project cost worksheets can be seen in **Appendix A**, Conceptual Level Project Cost Projections. It should be noted that these tables reflect only conceptual-level opinions or assumptions regarding the portions of future project costs that are recoverable through impact fees. Actual project costs are likely to change with time and are dependent on market and economic conditions that cannot be predicted.

The RIF CIP establishes the list of projects for which Impact Fees may be utilized. Projects not included in the RIF CIP are not eligible to receive impact fee funding. The cost projections utilized in this study should not be utilized for the City's construction CIP. Cost projections are unchanged in the 2021 Study Update. The only project changed (B-21 Wallin Bradley Drive) was conservatively kept at the same cost as the previous project B-21 in the adopted study from March 2019, which would have a higher cost due to longer length than the previous project. This would result in a slightly higher maximum fee for Service Area B, but for simplicity was not changed in the 2021 Study Update.

## F. Service Unit Calculation

The basic service unit for the computation of Round Rock's Roadway Impact Fees is the vehicle-mile of travel during the afternoon peak-hour (as explained on Pg. 24). To determine the cost per service unit, it is necessary to project the growth in vehicle-miles of travel for the service area for the ten-year period.

The growth in vehicle-miles from 2018 to 2028 is based upon projected changes in residential units and employment for the period. To determine this growth, estimates of residential units, basic employment, service employment, and retail employment for 2018 were made, along with growth projections for each of these demographic statistics through 2028. The Land Use Assumptions section of this report details the growth estimates used for impact fee determination.

For the purposes of impact fees, all developed and developable land is categorized as either residential or non-residential. For residential land uses, the existing and projected number of dwelling units are estimated. The number of dwelling units in each service area is multiplied by a *transportation demand factor* (discussed in more detail below) to compute the vehicle-miles of travel that occur during the afternoon peak hour. This factor indicates the average amount of demand created by the residential land uses in the service area.

For non-residential land uses, the process is similar. The Land Use Assumptions section of this report provides existing and projected number of building square footages for three (3) categories of employment – basic, service, and retail. These categories correspond to an aggregation of other specific land use categories based on the North American Industrial Classification System (NAICS).

Building square footage is the most common independent variable for the estimation of non-residential trips in the *Institute of Transportation Engineers (ITE) Trip Generation Manual, 10<sup>th</sup> Edition*. This characteristic is more appropriate than the number of employees, because building square footage is tied more closely to trip generation and

is known at the time of application for any development that would require the assessment of an impact fee.

The existing and projected land use assumptions for the dwelling units and the square footage of basic, service, and retail land uses provide the basis for the projected increase in vehicle-miles of travel. As noted earlier, a *transportation demand factor* is applied to these values and then summed to calculate the total peak hour vehicle-miles of demand for each service area.

The *transportation demand factors* are aggregate rates derived from two sources – the *ITE Trip Generation Manual, 10<sup>th</sup> Edition* and the National Household Travel Survey performed by the Federal Highway Administration (FHWA). The *ITE Trip Generation Manual, 10<sup>th</sup> Edition* provides the number of trips that are produced or attracted to the land use for each dwelling unit, square foot of building, or other corresponding unit. For the retail category of land uses, the rate is adjusted to account for the fact that a percentage of retail trips are made by people who would otherwise be traveling past that particular establishment anyway, such as a trip between work and home. For example, a stop at a nearby supermarket on the way home from work does not create a new trip onto the roadway network. These trips are called pass-by trips, and since the travel demand is accounted for in the land use calculations relative to the primary trip, it is necessary to discount the retail trip generation rates to avoid double counting trips. The next component of the *transportation demand factor* accounts for the length of each trip. The average trip length for each category is based on the Capital Area Metropolitan Planning Organization (CAMPO) long-range transportation model and supplemented with the National Household Travel Survey conducted by the FHWA.

The computation of the *transportation demand factor* is based on the following equation:

Variables:

$$TDF = T * (1 - P_b) * L_{\max}$$

$$\text{where... } L_{\max} = \min(L * OD \text{ or } 6)$$

TDF = Transportation Demand Factor,  
T = Trip Rate (peak hour trips / unit),  
P<sub>b</sub> = Pass-By Discount (% of trips),  
L<sub>max</sub> = Maximum Trip Length (miles),  
L = Average Trip Length (miles), and  
OD = Origin-Destination Reduction (50%)

The maximum trip length was limited to six (6) miles based on the maximum trip length within each service area. Chapter 395 of the Texas Local Government Code allows for a service area of six (6) miles, and the service areas within Round Rock are closely approximated with a six (6) mile distance.

The adjustment made to the average trip length statistic in the computation of the maximum trip length is the origin-destination reduction. This adjustment is made because the Roadway Impact Fee is charged to both the origin and destination end of the trip. For example, impact fee methodology will account for a trip from home to work within Round Rock to both residential and non-residential land uses. To avoid counting these trips twice as both residential and non-residential trips, a 50% origin-destination (OD) reduction factor is applied. Therefore, only half of the trip length is assessed to each land use, and the total trip is only counted once. This methodology is consistent with that used in the National Household Travel Survey. These lengths were developed based on the CAMPO long-range transportation model.

**Table 5** shows the derivation of the *Transportation Demand Factor* for the residential land uses and the three (3) non-residential land use categories. The values utilized for all variables shown in the *transportation demand factor* equation are also shown in the table.

**Table 5. Transportation Demand Factor Calculations**

Variable	Residential, Single Family	Residential, Multifamily	Basic	Service	Retail
<b>T</b>	0.99	0.56	0.63	1.15	3.81
<b>P<sub>b</sub></b>	0%	0%	0%	0%	34%
<b>L</b>	8.59	8.59	12.89	6.76	6.35
<b>L<sub>max</sub></b>	4.30	4.30	6.00	3.38	3.18
<b>TDF</b>	<b>4.26</b>	<b>2.41</b>	<b>3.78</b>	<b>3.89</b>	<b>7.98</b>
* L <sub>max</sub> is less than 6 miles for residential and retail land uses; therefore this lower trip length is used for calculating the TDF for these land uses.					

Variables:

- TDF = Transportation Demand Factor,
- T = Trip Rate (peak hour trips / unit),
- P<sub>b</sub> = Pass-By Discount (% of trips),
- L<sub>max</sub> = Maximum Trip Length (miles),
- L = Average Trip Length (miles), and
- OD = Origin-Destination Reduction (50%)

The application of the demographic projections and the *transportation demand factors* are presented in the 10-Year Growth Projections in **Table 6**. This table shows the growth in total vehicle-miles by service area between the years 2018 – 2028.

## V. ROADWAY IMPACT FEE CALCULATION

### A. Maximum Assessable Impact Fee Per Service Unit

This section presents the maximum assessable impact fee rate calculated for each service area. The maximum assessable impact fee is the sum of the eligible RIF CIP costs for the service area divided by the growth in travel attributable to new development projected to occur within the 10-year period. A majority of the components of this calculation have been described and presented in previous sections of this report. The purpose of this section is to document the computation for each service area and to demonstrate that the guidelines provided by Chapter 395 of the Texas Local Government Code have been addressed.

**Table 7** illustrates the computation of the maximum assessable impact fee computed for each service area. Each row in the table is numbered to simplify explanation of the calculation. The calculation of the maximum assessable impact fee is shown in **Table 8**. The Roadway Impact Fee CIP consists of both roadway segment and intersection improvements. The roadway segment component is referred to as the “Roadway Impact Fee CIP,” while the intersection component is referred to as the “Intersection Impact Fee CIP.”

**Table 7. Maximum Assessable Roadway Impact Fee Computation**

Line	Title	Description
1	<i>Total Vehicle-Miles of Capacity Added by the Roadway Impact Fee CIP</i>	The total number of vehicle-miles added to the service area based on the capacity, length, and number of lanes in each project (from <b>Appendix B</b> – Roadway Impact Fee CIP Units of Supply)

Each project identified in the RIF CIP will add a certain amount of capacity to the City’s roadway network based on its length and classification. This line displays the total amount added within each service area.

2	<i>Total Vehicle-Miles of Existing Demand</i>	A measure of the amount of traffic currently using the roadway facilities upon which capacity is being added. (from <b>Appendix B</b> – Roadway Impact Fee CIP Units of Supply)
---	---	---

A number of facilities identified in the RIF CIP have traffic currently utilizing a portion of their existing capacity. This line displays the total amount of capacity along these facilities currently being used by existing traffic.

3	<i>Total Vehicle-Miles of Existing Deficiencies</i>	Number of vehicle-miles of travel that are not accommodated by the existing roadway system (from <b>Appendix C</b> – Existing Roadway Facilities Inventory)
---	---	---

In order to ensure that existing deficiencies on the City’s roadway network are not recoverable through impact fees, this line is based on the entire roadway network within the service area. Any roadway within the service area that is deficient – even those not identified on the Roadway Impact Fee CIP – will have these additional trips removed from the calculation.

<b>4</b>	<i>Net Amount of Vehicle-Miles of Capacity Added</i>	A measurement of the amount of vehicle-miles added by the RIF CIP that will not be utilized by existing demand ( <b>Line 1 – Line 2 – Line 3</b> )
----------	--	--

This calculation identifies the portion of the RIF CIP (in vehicle-miles) that may be recoverable through the collection of impact fees.

<b>5</b>	<i>Total Cost of the Roadway Impact Fee CIP within the Service Area</i>	The total cost of the <b>roadway</b> projects within each service area (from <b>Table 4: 10-Year Roadway Impact Fee CIP with Conceptual Level Cost Projections</b> )
----------	---	--

This line simply identifies the total cost of all the roadway projects identified in each service area.

<b>6</b>	<i>Cost of Net Capacity Supplied</i>	The total Roadway Impact Fee CIP cost ( <b>Line 5</b> ) prorated by the ratio of Net Capacity Added ( <b>Line 4</b> ) to Total Capacity Added ( <b>Line 1</b> ). [( <b>Line 4</b> / <b>Line 1</b> ) * ( <b>Line 5</b> )]
----------	--------------------------------------	---

Using the ratio of vehicle-miles added by the Roadway Impact Fee CIP available to serve future growth to the total vehicle-miles added, the total cost of the RIF CIP is reduced to the amount available for future growth (i.e. excluding existing usage and deficiencies).

<b>7</b>	<i>Cost to Meet Existing Needs and Usage</i>	The difference between the Total Cost of the Roadway Impact Fee CIP ( <b>Line 5</b> ) and the Cost of the Net Capacity supplied ( <b>Line 6</b> ). ( <b>Line 5 – Line 6</b> )
----------	--	--

This line is provided for information purposes only – it is to present the portion of the total cost of the Roadway Impact Fee CIP that is required to meet existing demand.

<b>8</b>	<i>Total Vehicle-Miles of New Demand over Ten Years</i>	Based upon the growth projection provided in the <b>Land Use Assumptions</b> , an estimate of the number of new vehicle-miles within the service area over the next ten years. (from <b>Table 6</b> )
----------	---	---

This line presents the amount of growth (in vehicle-miles) projected to occur within each service area over the next ten years.

<b>9</b>	<i>Percent of Capacity Added Attributable to New Growth</i>	The result of dividing Total Vehicle-Miles of New Demand ( <b>Line 8</b> ) by the Net Amount of Capacity Added ( <b>Line 4</b> ), limited to 100% ( <b>Line 10</b> ). This calculation is required by Chapter 395 to ensure capacity added is attributable to new growth.
<b>10</b>	<i>Chapter 395 Check</i>	

In order to ensure that the vehicle-miles added by the Roadway Impact Fee CIP do not exceed the amount needed to accommodate growth beyond the ten-year window, a comparison of the two values is performed. If the amount of vehicle-miles added by the Roadway Impact Fee CIP exceeds the growth projected to occur in the next ten years, the Roadway Impact Fee CIP cost is reduced accordingly.

<b>11</b>	<i>Cost of Roadway Impact Fee CIP Attributable to New Growth</i>	The result of multiplying the Cost of Net Capacity Added ( <b>Line 6</b> ) by the Percent of Capacity Added Attributable to New Growth, limited to 100% ( <b>Line 10</b> ).
-----------	--	---

This value is the total Roadway Impact Fee CIP project costs (excluding financial costs) that may be recovered through impact fees. This line is determined considering the limitations to impact fees required by the Texas legislature.

<b>12</b>	<b>Total Cost of the <i>Intersection</i> Impact Fee CIP within the Service Area</b>	The total cost of the intersection projects within each service area (from <b>Table 4: 10-Year Roadway Impact Fee Capacity Improvements Plan with Conceptual Level Cost Projections</b> )
-----------	---	---

This line simply identifies the total cost of all the intersection projects identified in each service area.

<b>13</b>	<b>Percent of <i>Intersection</i> Capacity Added Attributable to New Growth</b>	The result of dividing Total Vehicle-Miles of New Demand ( <b>Line 8</b> ) by the vehicle-mile carrying capacity in each service area ( <b>Table 6</b> ).
-----------	---	---

In order to ensure that the capacity added by the Intersection Impact Fee CIP does not exceed the amount needed to accommodate growth beyond the ten-year window, the anticipated vehicle mile growth in each service area is calculated as a percentage of the vehicle-mile carrying capacity.

<b>14</b>	<b>Cost of <i>Intersection</i> Impact Fee CIP Attributable to New Growth</b>	The result of multiplying the Cost of Net Capacity Added ( <b>Line 12</b> ) by the Percent of Capacity Added Attributable to New Growth ( <b>Line 13</b> ). ( <b>Line 12 * Line 13</b> )
-----------	--	--

This value is the total Intersection Impact Fee CIP project cost (excluding financial costs) that may be recovered through impact fees. This line is determined considering the limitations to impact fees required by the Texas legislature.

<b>15</b>	<b>Credit for Previous Contributions</b>	The total contributions by development toward the building of improvements in the Roadway Impact Fee CIP.
-----------	--	---

This value is the total of all exactions upon development that resulted in a financial contribution towards future improvements in the Roadway Impact Fee CIP. This line is intended as a credit to development so as not to double charge for previous contributions for roadway capacity improvements.

<b>16</b>	<b>Cost of <i>Total</i> Roadway Impact Fee CIP Attributable to New Growth</b>	The result of adding the Cost of the Roadway Impact Fee CIP Attributable to new growth ( <b>Line 11</b> ) to the Cost of the Intersection Impact Fee CIP Attributable to new growth ( <b>Line 14</b> ) less credits for previous contributions ( <b>Line 11 + Line 14 – Line 15</b> ).
-----------	---	--

This value is the Total Roadway Impact Fee CIP project cost (excluding financial costs) that may be recovered through impact fees. This line is determined considering the limitations to impact fees required by the Texas legislature.

## B. Plan for Financing and the Ad Valorem Tax Credit

Chapter 395 of the Texas Local Government Code requires the Roadway Impact Fee Capital Improvements Plan for Roadway Impact Fees to contain specific enumeration of a plan for awarding the impact fee credit. Section 395.014 of the Code requires:

- (A) a credit for the portion of ad valorem tax and utility service revenues generated by new service units during the program period that is used for the payment of improvements, including the payment of debt, that are included in the transportation improvements plan; or

(B) In the alternative, a credit equal to 50 percent of the total projected cost of implementing the transportation improvements plan...”

The plan is summarized, as prepared by NewGen Strategies in **Appendix C** and **Appendix D**, Plan for Awarding the Roadway Impact Fee Credit. The following table summarizes the portions of **Table 8** that utilize this credit calculation.

Line	Title	Description
17	Financing Costs	(from <b>Appendix C</b> – Plan for Awarding the Roadway Impact Fee Credit)
18	Interest Earnings	(from <b>Appendix C</b> – Plan for Awarding the Roadway Impact Fee Credit)
19	Cost of the Roadway Impact Fee CIP and Financing Attributable to New Growth	The sum of the Cost of Capacity Added Attributable to New Growth, Financing Costs, and Interest Earnings. (Line 16 + Line 17 + Line 18)
20	Pre-Credit Maximum Fee Per Service Unit	Found by dividing the Cost of the CIP and Financing Attributable to New Growth (Line 19) by the Total Vehicle-Miles of New Demand Over Ten Years (Line 8). (Line 19 / Line 8)
21	Credit for Ad Valorem Taxes	A credit for the portion of ad valorem taxes projected to be generated by the new service units, as per Section 395.014 of the Local Government Code. (from <b>Appendix D</b> – Plan for Awarding the Roadway Impact Fee Credit)
22	Recoverable Cost of the Roadway Impact Fee CIP and Financing	The difference between the Cost of the CIP and Financing Attributable to New Growth (Line 19) and the Credit for Ad Valorem Taxes (Line 21). (Line 19 + Line 21)
23	Maximum Assessable Fee Per Service Unit	Found by dividing the Recoverable Cost of the CIP and Financing (Line 22) by the Total Vehicle-Miles of New Demand Over Ten Years (Line 8). (Line 22 / Line 8)

### C. Maximum Assessable Impact Fee Determination

The impact fee determination method employed by NewGen Strategies and Solutions, LLC is developed through a financial based model, which fully recognizes the requirements of Chapter 395, including the recognition of cash and/or debt financing, interest earnings, fund balances, and applicable credits associated with the use of ad valorem taxes. In developing the components of the financial model several assumptions must be made, including the following:

- Financing
  - Method of financing (i.e. cash or debt financing)
  - The level of financing (e.g. 50% debt / 50% cash)
  - Cost of financing
  - Debt repayment structure
- Timing and Level of Expenditures and Revenues
- Interest Earnings
- Annual Service Unit Growth
- Portion of Ad Valorem Tax Revenue Used to Fund Impact Fee Transportation Improvements

The assumptions employed in the maximum assessable impact fee determination provide a reasonable basis for forecasting, however, it must be emphasized that these assumptions may not necessarily reflect actual future conditions. To address this, Chapter 395 requires the monitoring of impact fees through the Impact Fee Advisory Committee, and allows for the option to update or revise impact fees to reflect the actual implementation of the impact fee program. **Assumptions are unchanged in the 2021 Study Update.**

Once the cost of capacity added that is attributable to growth (**Table 8** - line 16) is determined, it must then be decided how the cost will be financed: cash and/or debt. For any previously funded projects, whether partially funded or in full, actual costs of capital have been included. Based on discussions with City staff, unless specific funding has already been determined, it is assumed that the City will debt finance 50% of the future project costs and cash finance 50%. For debt financing, the cost of financing is based on the City's Financial Advisor's estimates of future debt costs for bonds issued with 20-year terms, as shown in

**Appendix E.** Debt service payments for each future debt issue are assumed to remain constant over the issue's term.

Currently, the exact timing and annual level of capital expenditures over the 10-year forecast is indeterminate; therefore, it is assumed that capital expenditures will occur in equal amounts over the 10-year program period. It is also assumed that for debt financed capital projects, the City will expend debt proceeds over a 2-year timeframe. For the calculation of the maximum assessable impact fee, debt is assumed to be issued in equal amounts for each year. Because of the 10-year forecast limitation, and in order to recognize the full amount of debt to be issued for the cost of capacity added that is attributable to growth during the 10-year period, a portion of year 9 and all of year 10 bond proceeds are assumed to be spent fully in year 10.

Because debt is issued over 20-year terms and impact fees developed herein are to be charged over a 10-year period, sufficient fund balance must be generated to meet the future debt service obligations. Because of the generation of the fund balance, excess monies will be available for interest earnings. Chapter 395 states that interest earnings are funds of the impact fee account and are to be held to the same restrictions as impact fee revenues. Therefore, in order to recognize that interest earnings are used to fund transportation improvements, interest earnings are credited against the costs recoverable through impact fees. It should be noted that Chapter 395 does not require the upfront recognition of interest earnings in the impact fee determination; however, in an effort to acknowledge the time value of the impact fee payers' monies, interest earnings have been credited. Interest is assumed to be earned at an annual rate of 1.71% based on the City's annual return on money market funds as of March 2018.

As with the timing and level of the capital expenditures over the 10-year forecast, the timing and annual level of service unit growth over the 10-year program period is indeterminate at the present time. As such, it is assumed that service unit growth will be consistent over the 10-year forecast.

Chapter 395 requires a plan for awarding either a credit for the portion of ad valorem tax and/or utility service revenues generated by new service units during the program period that are used for payment of improvements that are included in the Transportation Impact Fee TIP. As an alternative, a credit equal to 50% of the total cost of implementing the Transportation Impact Fee TIP may be used. The City has elected to pursue the determination of a credit for the portion of ad valorem tax revenues generated by new service units during the program period that are used for payment of improvements that are included in the Transportation Impact Fee TIP. It should be noted that the credit is not a determination to recognize the total ad valorem tax revenue generated by new service units, but is only a credit for the portion of ad valorem tax revenue that is used for payment of improvements that are included in the Transportation Impact Fee TIP. Theoretically, the credit determination could be zero (\$0) if the City does not utilize any of the new service unit ad valorem tax revenue to fund improvements that are included in the Transportation Impact Fee TIP. However, to be conservative and recognize potential cash flow issues that can occur with the funding of major capital improvement projects, it is assumed that the debt-funded projects (50% of the improvement costs included in the Transportation Impact Fee TIP) could potentially be funded by ad valorem tax revenue.

Since payments made through ad valorem tax revenue will consist of not only the revenue generated by new service units in the defined service area, but also existing property owners throughout the City, the portion attributable to the new service units in the defined service area must be isolated, as illustrated in the credit calculation in **Appendix E**.

**Table 8. Maximum Assessable Roadway Impact Fee**

SERVICE AREA:		A	B	C

#### D. Service Unit Demand Per Unit of Development

The Roadway Impact Fee is determined by multiplying the impact fee rate by the number of service units projected for the proposed development. For this purpose, the City will utilize the Land Use/Vehicle-Mile Equivalency Table (LUVMET), presented in **Table 9**. This table lists the predominant land uses that may occur within the City of Round Rock. For each land use, the development unit that defines the development's magnitude with respect to transportation demand is shown. Although every possible use cannot be anticipated, the majority of local uses are found in this table. The descriptions for each land use are presented in **Table 10**. If the exact use is not listed, one similar in trip-making characteristics can serve as a reasonable proxy. The individual land uses are grouped into categories, such as residential, office, commercial, industrial, and institutional.

The trip rates presented for each land use is a fundamental component of the LUVMET. The trip rate is the average number of trips generated during the afternoon peak hour by each land use per development unit. The next column in **Table 9**, if applicable to the land use, presents the percentage of trips to and from certain land uses reduced by pass-by trips, as previously discussed.

The definitive source of the trip generation and pass-by statistics is the *ITE Trip Generation Manual, 10<sup>th</sup> Edition*, the latest edition. This manual utilizes trip generation studies for a variety of land uses throughout the United States, and is the standard used by traffic engineers and transportation planners for traffic impact analysis, site design, and transportation planning. However, for land uses not contained within the 10<sup>th</sup> Edition of the *ITE Trip Generation Manual*, an alternative service unit demand could be calculated by completing a trip generation study based on the procedure identified in the *ITE Trip Generation Handbook*.

To convert vehicle trips to vehicle-miles, it is necessary to multiply trips by trip length. The trip length values are based on the CAMPO long range transportation model and supplemented by the *National Household Travel Survey* performed by the FHWA. The other adjustment to

trip length is the 50% origin-destination reduction to avoid double counting of trips. At this stage, another important aspect of the state law is applied – the limit on transportation service unit demand. If the adjusted trip length is above six (6) miles, the maximum trip length used for calculation is reduced to six (6) miles. This reduction, as discussed previously, limits the maximum trip length to the approximate size of the service areas.

The remaining column in the LUVMET shows the vehicle-miles per development unit. This number is the product of the trip rate and the maximum trip length. This number, previously referred to as the *Transportation Demand Factor*, is used in the impact fee to compute the number of service units attributed to each land use category. The number of service units is multiplied by the impact fee rate (established by City ordinance) in order to determine the impact fee for a development.

**Table 9. Land Use / Vehicle-Mile Equivalency Table (LUVMET)**

**Table 10. Land Use Descriptions**

Land Use Category	ITE Land Use Code	Land Use Description
<b>PORT AND TERMINAL</b>		
Truck Terminal	030	Point of good transfer between trucks or between trucks and rail
<b>INDUSTRIAL</b>		
General Light Industrial	110	Emphasis on activities other than manufacturing; typically employing fewer than 500 workers
Industrial Park	130	Area containing a number of industries or related facilities
Manufacturing	140	
Warehousing	150	Devoted to storage of materials but may include office and maintenance areas
Mini-Warehouse	151	Facilities with a number of units rented to others for the storage of goods
<b>RESIDENTIAL</b>		
Single-Family Detached Housing	210	Single-family detached homes on individual lots
Multifamily Housing (Low-Rise)	220	At least 3 rental dwelling units and one or two levels (floors) per building
Multifamily Housing (Mid-Rise)	221	At least 3 rental dwelling units and between three and ten levels (floors) per building
Multifamily Housing (High-Rise)	222	At least 3 rental dwelling units and more than ten levels (floors) per building
Mobile Home Park / Manufactured Home	240	
Senior Adult Housing-Detached	251	Consists of detached independent living developments that include amenities such as golf courses and swimming pools
Senior Adult Housing-Attached	252	Consists of attached independent living developments that include limited social or recreation services
Assisted Living	254	Residential settings that provide either routine general protective oversight or assistance with activities.
<b>LODGING</b>		
Hotel	310	Lodging facilities that typically have on-site restaurants, lounges, meeting and/or banquet rooms, or other retail shops and services
Motel / Other Lodging Facilities	320	Lodging facilities that may have small on-site restaurant or buffet area but little or no meeting space
<b>RECREATIONAL</b>		
Golf Driving Range	432	Facilities with driving tees for practice; may provide individual or group lessons; may have pro shop and/or refreshment facilities
Golf Course	430	May include municipal courses and private country clubs; may have driving ranges, pro shops, and restaurant/banquet facilities
Recreational Community Center	495	Category includes racquet clubs, health/fitness clubs, can include facilities such as YMCA's
Ice Skating Rink	465	Rinks for ice skating and related sports; may contain spectator areas and refreshment facilities
Miniature Golf Course	431	One or more individual putting courses; category should not be used when part of a larger entertainment center (with batting cages, video game centers, etc)
Multiplex Movie Theater	445	Movie theater with audience seating, minimum of ten screens, lobby, and refreshment area.
Racquet / Tennis Club	491	Indoor or outdoor facilities specifically designed for playing tennis
<b>INSTITUTIONAL</b>		
Church	560	Churches and houses of worship
Day Care Center	565	Generally includes facilities for care of pre-school aged children, generally includes classrooms, offices, eating areas, and playgrounds
Primary/Middle School (1-8)	522	Serves students who have not yet entered high school
High School	530	Serves students who have completed middle or junior high school
Junior / Community College	540	Two-year junior, community, or technical colleges
University / College	550	Four-year universities or colleges that may or may not offer graduate programs
<b>MEDICAL</b>		
Clinic	630	Facilities with limited diagnostic and outpatient care
Hospital	610	Medical and surgical facilities with overnight accommodations
Nursing Home	620	Rest and convalescent homes with residents who do little or no driving
Animal Hospital/Veterinary Clinic	640	Rest and convalescent homes with residents who do little or no driving
<b>OFFICE</b>		
Corporate Headquarters Building	714	Office building housing corporate headquarters of a single company or organization
General Office Building	710	Office buildings which house multiple tenants
Medical-Dental Office Building	720	Multi-tenant building with offices for physicians and/or dentists
Single Tenant Office Building	715	Single tenant office buildings other than corporate headquarters
Office Park	750	Office buildings (typically low-rise) in a campus setting and served by a common roadway system

**Table 10 (Cont'd). Land Use Descriptions**

Land Use Category	ITE Land Use Code	Land Use Description
<b>COMMERCIAL</b>		
<b>Automobile Related</b>		
Automobile Care Center	942	Automobile repair and servicing including stereo installations and upholstery
Automobile Parts Sales	843	Retail sale of auto parts but no on-site vehicle repair
Gasoline/Service Station	944	Gasoline sales without convenience store or car wash; may include repair
Gasoline/Service Station w/ Conv Market and Car Wash	946	Gasoline sales with convenience store and car washes where the primary business is gasoline sales
New Car Sales	841	New car dealerships, typically with automobile servicing, part sales, and used car sales
Quick Lubrication Vehicle Shop	941	Primary business is to perform oil changes and fluid/filter changes with other repair services not provided
Self-Service Car Wash	947	Has stalls for driver to park and wash the vehicle
Tire Store	848	Primary business is sales and installation of tires; usually do not have large storage or warehouse area
<b>Dining</b>		
Fast Food Restaurant with Drive-Thru Window	934	High-turnover fast food restaurant for carry-out and eat-in customers with a drive-thru window
Fast Food Restaurant without Drive-Thru Window	933	High-turnover fast food restaurant for carry-out and eat-in customers, but without a drive-thru window
High Turnover (Sit-Down) Restaurant	932	Restaurants with turnover rates less than one hour; typically includes moderately-priced chain restaurants
Quality Restaurant	931	Restaurants with turnover rates of one hour or longer; typically require reservations
Coffee/Donut Shop with Drive-Thru Window	937	Coffee and Donut restaurants with drive-through windows, hold long store hours and have limited indoor seating
<b>Other Retail</b>		
Free-Standing Discount Store	815	Category includes free-standing stores with off-street parking; typically offer a variety of products and services with long store hours
Nursery (Garden Center)	817	Building with a yard of planting or landscape stock; may have office, storage, shipping or greenhouse facilities
Home Improvement Superstore	862	Warehouse-type facilities offering a large variety of products and services including lumber, tool, paint, lighting, and fixtures, among other items.
Pharmacy/Drugstore w/o Drive-Thru Window	880	Facilities that primarily sell prescription and non-prescription drugs without a drive-through window
Pharmacy/Drugstore w/ Drive-Thru Window	881	Facilities that primarily sell prescription and non-prescription drugs with a drive-through window
Shopping Center	820	Integrated group of commercial establishments; planning, owned, and managed as a unit
Supermarket	850	Primary business is sale of groceries, food, and household cleaning items; may include photo, pharmacy, video rental, and/or ATM
Toy/Children's Superstore	864	Businesses specializing in child-oriented merchandise
Department Store	875	Free-standing stores that specialize in the sale of apparel, footwear, bedding, home products, jewelry, etc.
<b>SERVICES</b>		
Walk-In Bank	911	Banks with their own parking lots, no drive-in lanes but contain non-drive-through ATMs
Drive-In Bank	912	Banking facilities to conduct financial transactions from the vehicle; also usually apart of walk-in bank
Hair Salon	918	Facilities that specialize in cosmetic and beauty services including hair cutting and styling

## VI. SAMPLE CALCULATIONS

The following section details two (2) examples of maximum assessable Roadway Impact Fee calculations.

### Example 1:

**Development Type - One (1) Unit of Single-Family Housing in Service Area A**

Roadway Impact Fee Calculation Steps – Example 1	
<b>Step 1</b>	<b>Determine Development Unit and Vehicle-Miles Per Development Unit</b>
	<i>From Table 9 [Land Use – Vehicle-Mile Equivalency Table]</i> Development Type: 1 Dwelling Unit of Single-Family Detached Housing Number of Development Units: 1 Dwelling Unit Veh-Mi Per Development Unit: 4.26
<b>Step 2</b>	<b>Determine Maximum Assessable Impact Fee Per Service Unit (Vehicle-Mile)</b>
	<i>From Table 8, Line 19 [Maximum Assessable Fee Per Service Unit]</i> Service Area A: \$2,678
<b>Step 3</b>	<b>Determine Maximum Assessable Impact Fee</b>
	Impact Fee = # of Development Units * Veh-Mi Per Dev Unit * Max. Fee Per Service Unit Impact Fee = 1 * 4.26 * \$2,678 Maximum Assessable Impact Fee = \$11,408.28

### Example 2:

**Development Type – 100,000 square foot Home Improvement Superstore in Service Area C**

Roadway Impact Fee Calculation Steps – Example 2	
<b>Step 1</b>	<b>Determine Development Unit and Vehicle-Miles Per Development Unit</b>
	<i>From Table 9 [Land Use – Vehicle-Mile Equivalency Table]</i> Development Type: 100,000 square feet of Home Improvement Superstore Development Unit: 1,000 square feet of Gross Floor Area Veh-Mi Per Development Unit: 3.85
<b>Step 2</b>	<b>Determine Maximum Assessable Impact Fee Per Service Unit (Vehicle-Mile)</b>
	<i>From Table 8, Line 19 [Maximum Assessable Fee Per Service Unit]</i> Service Area C: \$2,511
<b>Step 3</b>	<b>Determine Maximum Assessable Impact Fee</b>
	Impact Fee = # of Development Units * Veh-Mi Per Dev Unit * Max. Fee Per Service Unit Impact Fee = 100 * 3.85 * \$2,511 Maximum Assessable Impact Fee = \$966,735

## VII. ADOPTION AND ADMINISTRATION OF ROADWAY IMPACT FEES

### A. Adoption Process

Chapter 395 of the Texas Local Government Code stipulates a specific process for the adoption of Roadway Impact Fees. A Capital Improvements Advisory Committee (CIAC) is required to review the Land Use Assumptions and Roadway Impact Fees CIP used in calculating the maximum fee, and to provide the Committee's findings for consideration by the City Council. This CIAC also reviews the calculation and resulting maximum fees and provides its findings to the City Council. The composition of the CIAC is required to adequately represent the building and development communities. The City Council then conducts a first public hearing on the Roadway Impact Fee Assumptions (Land Use and Capital Improvements Plan) and a second public hearing on the Roadway Impact Fee Calculation and Roadway Impact Fee Ordinance.

Following policy adoption, the CIAC is tasked with advising the City Council of the need to update the Land Use Assumptions or the Roadway Impact Fees CIP at any time within five years of adoption. Finally, the CIAC oversees the proper administration of the Impact Fee, once in place, and advises the Council as necessary.

### B. Collection and Use of Roadway Impact Fees

Roadway Impact Fees are assessed when a final plat is recorded. The assessment defines the impact of each unit at the time of platting, according to land use, and may not exceed the maximum impact fee allowed by law. Roadway Impact Fees are collected when a building permit is issued. Therefore, funds are not collected until development-impacts are introduced to the transportation system. Funds collected within a service area can be used only within the same service area. Finally, fees must be utilized within 10 years of collection, or must be refunded with interest.

## VIII. CONCLUSIONS

The City of Round Rock has established a process to implement the assessment and collection of Roadway Impact Fees through the adoption of an impact fee ordinance that is consistent with Chapter 395 of the Texas Local Government Code.

This report establishes the maximum allowable Roadway Impact Fee that could be assessed by the City of Round Rock, as shown in the previously referenced **Table 8**.

This document serves as a guide to the assessment of Roadway Impact Fees pertaining to future development, and the City's need for transportation improvements to accommodate that growth. Following the public hearing process, the City Council may establish an impact fee amount to be collected, up to the calculated maximum and establish the Roadway Impact Fee Ordinance accordingly.

In conclusion, it is our opinion that the data and methodology used in this analysis are appropriate and consistent with Chapter 395 of the Texas Local Government Code. Furthermore, the Land Use Assumptions and the proposed Roadway Impact Fee Capital Improvements Plan are appropriately incorporated into the development of the maximum assessable Roadway Impact Fee.

Below is the listing of the 2021 Roadway Impact Fee Study's Maximum Assessable Impact Fee Per Service Unit (Vehicle-Mile), unchanged from the originally adopted study from March 2019:

Service Area	Maximum Fee Per Service Unit (per Vehicle-Mile)
A	\$2,678
B	\$2,933
C	\$2,511

**A. Conceptual Level Project Cost Projections**

2018 Roadway Impact Fee Study Cost Per Service Area \$ 34,673

**TOTAL COST IN SERVICE AREA A \$ 166,413,935**

1. Veh-Mi Supply Pk-Hr Total = [Length (mi)] \* [Exist Lanes] \* [Veh-Mi Capacity Pk-Hr Per Ln] \* [% in Service Area]

2. Veh-Mi Demand Pk-Hr Total = [Length (mi)] \* [PM Peak Hour Vol] \* [% in Service Area]

3. Excess Capacity Pk-Hr Veh-Mi = [Veh-Mi Supply Pk-Hr Total] - [Veh-Mi Demand Pk-Hr Total]

Note: Mileage lengths are shown as rounded to the nearest 0.01. Actual calculations were performed using exact mileage length [Length (ft) / 5,280]. "n/a" are roadways that were not analyzed. Most of these roadways were 2 Lane Collectors or bridges over I-35 included as intersection projects.

2018 Roadway Impact Fee Study Cost Per Service Area \$ 34,673

**TOTAL COST IN SERVICE AREA C \$ 177,255,560**

1. Veh-Mi Supply Pk-Hr Total = [Length (mi)] \* [Exist Lanes] \* [Veh-Mi Capacity Pk-Hr Per Ln] \* [% in Service Area]

2. Veh-Mi Demand Pk-Hr Total = [Length (mi)] \* [PM Peak Hour Vol] \* [% In Service Area]

3. Excess Capacity Pk-Hr Veh-Mi = [Veh-Mi Supply Pk-Hr Total] - [Veh-Mi Demand Pk-Hr Total]

Note: Mileage lengths are shown as rounded to the nearest 0.01. Actual calculations were performed using exact mileage length [Length (ft) / 5,280]. "n/a" are roadways that were not analyzed. Most of these roadways were 2 Lane Collectors or bridges over I-35 included as intersection projects.

1. Veh-Mi Supply Pk-Hr Total = [Length (mi)] \* [Exist Lanes] \* [Veh-Mi Capacity Pk-Hr Per Ln] \* [% in Service Area]

2. Veh-Mi Demand Pk-Hr Total = [Length (mi)] \* [PM Peak Hour Vol] \* [% in Service Area]

3. Excess Capacity Pk-Hr Veh-Mi = [Veh-Mi Supply Pk-Hr Total] - [Veh-Mi Demand Pk-Hr Total]

4. Existing Deficiencies Pk-Hr Veh-Mi = [Veh-Mi Demand Pk-Hr Total] - [Veh-Mi Supply Pk-Hr Total]

Note: Mileage lengths are shown as rounded to the nearest 0.01. Actual calculations were performed using exact mileage length [Length (ft) / 5,280]. "n/a" are roadways that were not analyzed. Most of these roadways were 2 Lane Collectors or bridges over I-35 included as intersection projects.

## **Appendix D – Plan for Awarding the Roadway Impact Fee Credit Summary** *(as prepared by NewGen Strategies.)*

## SUMMARY OF ROADWAY IMPACT FEE DETERMINATION

Service Area A

Recoverable Impact Fee CIP Costs	\$ 37,155,848	Line 16, Maximum Fee Calculation Table
Principal Paid on Existing Debt Funded Project Costs	(290,195)	Page 4 of Appendix E - Service Area A
Financing Costs	10,724,680	See Detail Below
Existing Fund Balance	-	Page 1 of Appendix E - Service Area A
Interest Earnings	(4,125,954)	Page 5 of Appendix E - Service Area A
<b>Pre Credit Recoverable Cost for Impact Fee</b>	<b>\$ 43,464,380</b>	Sum of Above
Credit for Ad Valorem Revenues	(273,155)	Page 8 of Appendix E - Service Area A
<b>Maximum Recoverable Cost for Impact Fee</b>	<b>\$ 43,191,225</b>	

### Recoverable Impact Fee CIP Costs:

Represents the portion of capital improvement costs that are eligible for funding through impact fees.  
Reference is Service Area A column, line 16 on the Max Fee Calculation Table.

### Principal Paid on Existing Debt Funded Project Costs:

Represents the portion of principal paid for existing debt funded project costs as provided by the City.

### Financing Costs:

Represents the interest costs associated with debt financing the new impact fee project costs. It is assumed one-half of the new impact fee project costs will be funded through new debt issues (Page 7 of Appendix E - Service Area A). Interest costs are derived from forecasted debt issues.

New Annual Debt Service	\$ 26,003,735	(Page 3 of Appendix E - Service Area A)
Existing Annual Debt Service	3,015,472	(Page 3 of Appendix E - Service Area A)
Principal Component	(18,294,527)	(Page 4 of Appendix E - Service Area A)
Financing Costs	<u>\$ 10,724,680</u>	

### Interest Earnings:

Represents the interest earned on cash flows. Assumes a 1.71% annual interest rate based on the City's current annual return as of 03/14/2018. The Impact Fee Statute states that interest earnings are funds of the impact fee account and are held to the same restrictions as impact fee revenues. Therefore in order to recognize that interest earnings are used to fund capital improvements, interest earnings are credited against the recoverable costs. Reference is the sum of Accumulated Interest on page 5 of Appendix E - Service Area A.

### Pre Credit Recoverable Cost for Impact Fee

Represents Recoverable Impact Fee CIP Costs plus Financing Costs less Interest Earnings.

### Credit for Ad Valorem Revenues:

In 2001, the Impact Fee Statute was amended to include a credit for ad valorem and utility revenues generated by new service units during the ten-year timeframe that are used to fund impact fee eligible projects for which the new service units were charged an impact fee. The intent of this amendment is to avoid double-charging the new service units for impact fee capital improvements. The credit recognizes ad valorem revenues used to fund the debt service of debt financed impact fee eligible projects and assumes that all non-debt funded impact fee eligible project costs will be funded solely through impact fee revenues or non-ad valorem revenue sources. Reference is page 8 of Appendix E - Service Area A.

### Maximum Recoverable Cost for Impact Fee:

Represents Pre Credit Recoverable Cost for Impact Fee less Credit for Ad Valorem Revenues.  
This is the maximum cost that can be recovered through impact fees.

## SUMMARY OF ROADWAY IMPACT FEE DETERMINATION

Service Area B

Recoverable Impact Fee CIP Costs	\$ 83,055,152	Line 16, Maximum Fee Calculation Table
Principal Paid on Existing Debt Funded Project Costs	(125,808)	Page 4 of Appendix E - Service Area B

Financing Costs	24,921,243	See Detail Below
Existing Fund Balance	-	Page 1 of Appendix E - Service Area C
Interest Earnings	(9,934,786)	Page 5 of Appendix E - Service Area C
<b>Pre Credit Recoverable Cost for Impact Fee</b>	<b>\$ 117,374,440</b>	Sum of Above
Credit for Ad Valorem Revenues	(1,553,766)	Page 8 of Appendix E - Service Area C
<b>Maximum Recoverable Cost for Impact Fee</b>	<b>\$ 115,820,674</b>	

### Recoverable Impact Fee CIP Costs:

Represents the portion of capital improvement costs that are eligible for funding through impact fees.  
Reference is Service Area C column, line 16 on the Max Fee Calculation Table.

### Principal Paid on Existing Debt Funded Project Costs:

Not Applicable to Service Area C

### Financing Costs:

Represents the interest costs associated with debt financing the new impact fee project costs. It is assumed one-half of the new impact fee project costs will be funded through new debt issues (Page 7 of Appendix E - Service Area C). Interest costs are derived from forecasted debt issues.

New Annual Debt Service	\$ 65,618,253	(Page 3 of Appendix E - Service Area C)
Existing Annual Debt Service	-	(Page 3 of Appendix E - Service Area C)
Principal Component	(40,697,010)	(Page 4 of Appendix E - Service Area C)
Financing Costs	<u>\$ 24,921,243</u>	

### Interest Earnings:

Represents the interest earned on cash flows. Assumes a 1.71% annual interest rate based on the City's current annual return as of 03/14/2018. The Impact Fee Statute states that interest earnings are funds of the impact fee account and are held to the same restrictions as impact fee revenues. Therefore in order to recognize that interest earnings are used to fund capital improvements, interest earnings are credited against the recoverable costs. Reference is the sum of Accumulated Interest on page 5 of Appendix E - Service Area C.

### Pre Credit Recoverable Cost for Impact Fee

Represents Recoverable Impact Fee CIP Costs plus Financing Costs less Interest Earnings.

### Credit for Ad Valorem Revenues:

In 2001, the Impact Fee Statute was amended to include a credit for ad valorem and utility revenues generated by new service units during the ten-year timeframe that are used to fund impact fee eligible projects for which the new service units were charged an impact fee. The intent of this amendment is to avoid double-charging the new service units for impact fee capital improvements. The credit recognizes ad valorem revenues used to fund the debt service of debt financed impact fee eligible projects and assumes that all non-debt funded impact fee eligible project costs will be funded solely through impact fee revenues or non-ad valorem revenue sources. Reference is page 8 of Appendix E - Service Area C.

### Maximum Recoverable Cost for Impact Fee:

Represents Pre Credit Recoverable Cost for Impact Fee less Credit for Ad Valorem Revenues.  
This is the maximum cost that can be recovered through impact fees.

## Capital Improvement Plan for Impact Fees

### Appendix E - Impact Fee Calculation Assumptions

#### Service Area A

#### I. General Assumptions

Annual Interest Rate on Deposits <sup>(1)</sup>	1.71%
Annual Service Unit Growth <sup>(2)</sup>	1,613
Existing Fund Balance <sup>(3)</sup>	-
Portion of Projects Funded by Existing Debt <sup>(4)</sup>	\$ 2,456,979
Non-debt Funded New Project Cost <sup>(5)</sup>	18,571,126
New Project Cost Funded Through New Debt <sup>(6)</sup>	16,127,743
Total Recoverable Project Cost <sup>(7)</sup>	\$ 37,155,848

#### II. New Debt Issues Assumptions

<u>Year</u>	<u>Principal<sup>(8)</sup></u>	<u>Interest<sup>(9)</sup></u>	<u>Term</u>
1	\$ 1,612,774	4.00%	20
2	1,612,774	4.50%	20
3	1,612,774	4.75%	20
4	1,612,774	5.00%	20
5	1,612,774	5.00%	20
6	1,612,774	5.25%	20
7	1,612,774	5.25%	20
8	1,612,774	5.50%	20
9	1,612,774	5.50%	20
10	1,612,774	5.75%	20
Total	\$ 16,127,743		

#### III. Capital Expenditure Assumptions

<u>Year</u>	<u>Annual Capital Expenditures<sup>(10)</sup></u>
1	\$ 2,602,415
2	3,469,887
3	3,469,887
4	3,469,887
5	3,469,887
6	3,469,887
7	3,469,887
8	3,469,887
9	3,469,887
10	4,337,359
Total	\$ 34,698,869

- (1) Money Market Earnings per City Staff As of March 2018  
(2) Derived from the 10-year Growth Projections Report, Table 7  
(3) New Impact Fee, Balance Not Applicable  
(4) Provided by City Staff  
(5) Assumes 50% of new project costs funded through sources other than debt  
(6) Assumes 50% of new project costs funded through new debt issues  
(7) Line 16 of the Max Fee Table Report  
(8) Assumes new debt issued in equal annual amounts  
(9) Estimated interest cost provided by City's Financial Advisor  
(10) Assumes new debt proceeds expended over a 2-year timeframe with Year 10 bond proceeds spent in one year; Non-debt funded capital expenditures made in equal annual amounts

### Appendix E - Impact Fee Calculation Assumptions

#### Service Area B

#### I. General Assumptions

Annual Interest Rate on Deposits <sup>(1)</sup>	1.71%
Annual Service Unit Growth <sup>(2)</sup>	3,278
Existing Fund Balance <sup>(3)</sup>	-
Portion of Projects Funded by Existing Debt <sup>(4)</sup>	\$ 603,043
Non-debt Funded New Project Cost <sup>(5)</sup>	42,452,643
New Project Cost Funded Through New Debt <sup>(6)</sup>	39,999,467
Total Recoverable Project Cost <sup>(7)</sup>	\$ 83,055,152

#### II. New Debt Issues Assumptions

<u>Year</u>	<u>Principal<sup>(8)</sup></u>	<u>Interest<sup>(9)</sup></u>	<u>Term</u>
1	\$ 3,999,947	4.00%	20
2	3,999,947	4.50%	20
3	3,999,947	4.75%	20
4	3,999,947	5.00%	20
5	3,999,947	5.00%	20
6	3,999,947	5.25%	20
7	3,999,947	5.25%	20
8	3,999,947	5.50%	20
9	3,999,947	5.50%	20
10	3,999,947	5.75%	20
Total	\$ 39,999,467		

#### III. Capital Expenditure Assumptions

<u>Year</u>	<u>Annual Capital Expenditures<sup>(10)</sup></u>
1	\$ 6,183,908
2	8,245,211
3	8,245,211
4	8,245,211
5	8,245,211
6	8,245,211
7	8,245,211
8	8,245,211
9	8,245,211
10	10,306,514
Total	\$ 82,452,109

- (1) Money Market Earnings per City Staff As of March 2018
- (2) Derived from the 10-year Growth Projections Report, Table 7
- (3) New Impact Fee, Balance Not Applicable
- (4) Provided by City Staff
- (5) Assumes 50% of new project costs funded through sources other than debt
- (6) Assumes 50% of new project costs funded through new debt issues
- (7) Line 16 of the Max Fee Table Report
- (8) Assumes new debt issued in equal annual amounts
- (9) Estimated interest cost provided by City's Financial Advisor
- (10) Assumes new debt proceeds expended over a 2-year timeframe with Year 10 bond proceeds spent in one year; Non-debt funded capital expenditures made in equal annual amounts

### Appendix E - Impact Fee Calculation Assumptions

#### Service Area C

#### I. General Assumptions

Annual Interest Rate on Deposits <sup>(1)</sup>	1.71%
Annual Service Unit Growth <sup>(2)</sup>	4,613
Existing Fund Balance <sup>(3)</sup>	-
Portion of Projects Funded by Existing Debt <sup>(4)</sup>	\$ -
Non-debt Funded New Project Cost <sup>(5)</sup>	61,690,973
New Project Cost Funded Through New Debt <sup>(6)</sup>	40,697,010
Total Recoverable Project Cost <sup>(7)</sup>	\$ 102,387,983

#### II. New Debt Issues Assumptions

<u>Year</u>	<u>Principal<sup>(8)</sup></u>	<u>Interest<sup>(9)</sup></u>	<u>Term</u>
1	\$ 4,069,701	4.00%	20
2	4,069,701	4.50%	20
3	4,069,701	4.75%	20
4	4,069,701	5.00%	20
5	4,069,701	5.00%	20
6	4,069,701	5.25%	20
7	4,069,701	5.25%	20
8	4,069,701	5.50%	20
9	4,069,701	5.50%	20
10	4,069,701	5.75%	20
Total	\$ 40,697,010		

#### III. Capital Expenditure Assumptions

<u>Year</u>	<u>Annual Capital Expenditures<sup>(10)</sup></u>
1	\$ 7,679,099
2	10,238,798
3	10,238,798
4	10,238,798
5	10,238,798
6	10,238,798
7	10,238,798
8	10,238,798
9	10,238,798
10	12,798,498
Total	\$ 102,387,983

- (1) Money Market Earnings per City Staff As of March 2018
- (2) Derived from the 10-year Growth Projections Report, Table 7
- (3) New Impact Fee, Balance Not Applicable
- (4) Provided by City Staff
- (5) Assumes 50% of new project costs funded through sources other than debt
- (6) Assumes 50% of new project costs funded through new debt issues
- (7) Line 16 of the Max Fee Table Report
- (8) Assumes new debt issued in equal annual amounts
- (9) Estimated interest cost provided by City's Financial Advisor
- (10) Assumes new debt proceeds expended over a 2-year timeframe with Year 10 bond proceeds spent in one year; Non-debt funded capital expenditures made in equal annual amounts
