**Freedom Church Rezoning from OF to PF-2
ZONING ZON1807-001**

HISTORY: Approximately 11 acres, including this property, was rezoned to OF (Office) from SF-1 & SF-2 (Single family – large lot & standard lot) in 2008. The property contains several single family residential homes. No new development has occurred since the rezoning.

DATE OF REVIEW: August 1, 2018

LOCATION: 1651 Sam Bass Road

STAFF REVIEW AND ANALYSIS:

General Plan and Zoning: The property is designated for residential in the general plan and is currently zoned as OF (Office).

Request: The owner requests that the zoning for an 8.59-acre portion of the property be rezoned to accommodate a place of worship, a use which is not permitted in the OF (Office) zoning district.

PF (Public facilities): The PF (Public facilities) zoning districts provide for public and institutional uses, including places of worship, at low, medium and high intensity levels. A place of worship is defined as a building providing for regular organized religious worship, including classroom space for religious education and parsonages or rectories. Accessory uses to a place of worship may include primary or secondary educational facilities, offices, community recreational facilities and day care facilities, including facilities for mother's day out programs. The size of these accessory uses is limited according to the three PF zoning district intensity levels.

The PF-1 (Public facilities – low intensity) district provides for accessory uses totaling less than 2,500 square feet and the site must have direct access to a collector or higher street; the PF-2 (Public facilities – medium intensity) district provides for accessory uses totaling more than 2,500 square feet, but less than 20,000 square feet and the site must have frontage on, or direct access to, a collector or higher street; and the PF-3 (Public facilities – high intensity) district provides for unrestricted square footage of accessory uses and the site must have frontage on, or direct access to, an arterial street.

PF-2 (Public facilities – medium intensity): This district was determined to be the most appropriate for this site, based upon the size and location of the property. In addition to worship and religious education space, this zoning district would allow accessory uses, up to a maximum of 20,000 square feet.

Traffic: The applicant intends to construct a building for worship services of approximately 13,000 square feet. Since this is not expected to generate 100 trips per hour during the peak hour, no traffic study is required. If accessory uses are proposed, an evaluation of their potential traffic impact will be considered prior to the approval of a site development plan.

Additional Considerations: The minister of Freedom Church, the applicant, wrote a letter describing their plans for the property and it was included in the public hearing notice sent to the surrounding property owners. A sign was posted along Sam Bass Road adjacent to the site on July 20, 2018.

RECOMMENDED MOTION:

Staff recommends approval of the rezoning from OF (Office) to PF-2 (Public facilities – medium intensity).
