**Kalahari Resorts Final Plat of Lot 2, Block F
FINAL PLAT FP1912-002**

BACKGROUND: The Planning and Zoning (P&Z) Commisison approved the Preliminary Plat ("PP1909-003") for this property on October 16, 2019. This Final Plat will create one development lot for the future development of Kalahari Resort employee housing.

DATE OF REVIEW: January 8, 2020

LOCATION: West of S. Kenney Fort Blvd. and south of E. Palm Valley Blvd.

STAFF REVIEW AND ANALYSIS:

General Plan and Zoning:

The Future Land Use designation is determined by PUD No. 114, which contains a mixture of retail and commercial land uses. Specific development standards are included in the PUD. For requirements not mentioned in the PUD, the C-1a zoning district standards will apply. The lot allows for commercial land uses such as offices, hotels, retail, and restaurants by right.

Compliance with the Preliminary Plat:

As shown, the Final Plat is in compliance with the Preliminary Plat ("PP1909-003") approved by the P&Z.

Traffic, Access and Roads:

A traffic impact analysis (TIA) has been completed and approved. Transportation improvements are occurring with the initial construction of the resort hotel and convention center.

Water and Wastewater Service:

Water and wastewater service will be provided by the City of Round Rock. Water service will be provided via an existing 12-inch waterline stub from S. Kenney Fort Boulevard. Wastewater service will be provided via a connection to an existing manhole located in Brushy Creek to the south of the property.

Drainage:

A total of four (4) detention ponds for the entire Kalahari development, including the 3.56 acre employee housing lot, are planned to handle the storm water runoff that will be generated by the improvements on the resort hotel site and with the new public roads planned for the initial phase of construction. Taken together, this storm water management system will ensure that runoff to Brushy Creek occurs at a rate as if the land remained undeveloped, preventing undue adverse impacts to upstream and downstream properties. Future development on other lots will have to provide similar measures or prove the existing regional stormwater management system has the capacity to handle the new runoff.

RECOMMENDED MOTION:

Staff recommends approval as presented
