Consider a resolution authorizing the Mayor to execute a Contract for Engineering Services with Halff Associates, Inc. for the Stormwater Master Plan Update Project.

The City has dedicated funds to develop a Stormwater Master Plan that is intended to be a comprehensive guide that the City will use to manage its storm water system. A comprehensive Stormwater Master Plan was previously completed in 2014. This engineering contract will be performed to provide an update to the current master plan by providing the necessary consultant services needed to assess the areas within the City where no improvements or updates have been performed.

City staff recommends contracting with Halff Associates for the Engineering Services for an update to the City's Stormwater Master Plan. The update to the master plan will revisit past known issues within the creeks and identify and assess potential flood and erosion risks. In addition, the proposal includes a task for evaluating creek cleaning needs, vulnerable areas, and prepare a scoring matrix to prioritize debris removal areas.

This contract will be completed in approximately seven months from notice to proceed.

Cost: $88,141
Source of Funds: 2014 Drainage Revenue Bonds
