Consider a resolution authorizing the Mayor to execute a Contract with Austin Engineering Company, Inc. for the Brushy Creek Phase 5 Wastewater Line Project.

On September 9, 2016, Walker Partners was authorized to provide engineering design, bidding and construction phase services for the Brushy Creek Phase 5 Wastewater project. This wastewater line improvement will consist of construction of approximately 600 linear feet of new 8-inch diameter wastewater main beginning just east of the intersection of Sunset Drive and Chisholm Train Road heading west across Chisholm Trail Road into City-owned property. The line then turns south and extends through the City-owned property and joins an existing 12-inch wastewater line. This new line will replace a portion of an existing 6-inch clay tile wastewater line which runs north and south parallel to Chisholm Trail Road. This new line will not only be upsized and provide newer pipe materials for the area, but it will also reduce the likelihood of future road closures along Chisholm Trail Road by routing the flow away from the street. The portion of existing 6-inch line will be properly abandoned along Chisholm Trail Road.

On June 8, 2017 five bids were submitted and the lowest bid in the amount of \$144,618 was submitted by Austin Engineering Company Inc.

Cost: \$144,618.00
