Consider a resolution authorizing the Mayor to execute a Contract for Engineering Services with DCS Engineering, LLC for the Gattis School Wastewater Extension Project.

In January 2017, the City involuntarily annexed several properties along the south side Gattis School Road from future Kenney Fort Boulevard to Via Sonoma Trail. These properties are not presently served by City wastewater. Based on the annexation requirements, the City is required to provide utility service to these properties within two and half years of the involuntary annexation.

This Item is for the professional engineering services required to design approximately 3,515 feet of 8 -inch wastewater main along the proposed route to service the annexed properties. In addition, a 150 foot waterline extension will be provided to bring water from the north side of Gattis School Road to the south side of Gattis School Road. Staff recommends DCS Engineering, LLC for engineering services for this project.

Cost: \$95,074.10

Source of Funds: Self-Financed Wastewater Construction
